

BT Radianz Services

Connecting the Global Financial Services Community for 10 years

BT Radianz Managed Infrastructure

The BT Radianz Managed Infrastructure is the leading connectivity and hosting platform for financial firms around the world. All technology, operations, and customer support for the BT Radianz platform are tailored to meet the exacting requirements that financial industry customers demand. The BT Radianz service supports 14,000 financial customer locations around the world, providing connectivity to more than 400 of the world's leading financial content and service providers including the top 10 global stock exchanges, top 50 global broker-dealers, and 48 of the top 50 global asset managers.

BT Radianz Features

The unique design and capacity management of the BT Radianz Managed Infrastructure results in low latency access to market data, trade execution, and trade cycle applications and services.

BT Radianz advanced capabilities include BT Radianz Ultra Access, which provides ultra-low latency connectivity with sub-millisecond round-trip delays to select exchanges. BT Radianz Proximity Solution combines high-performance connectivity with fully-managed hosting facilities to offer the fastest access to more than 25 exchanges around the world.

BT Radianz services consolidate all of a customer's external market connectivity onto a single connection, ensuring fast, secure, reliable access to trading partners and services throughout the securities trade cycle. BT Radianz connectivity is fully-redundant, diversely routed to the customer site, and carries a 100% Service Level Agreement (SLA).

BT's engineering team designs and manages all connectivity to ensure that customers have the capacity and resiliency needed to reliably receive market data, trade, settle and communicate with their counterparties. Connectivity is constantly monitored, so as market volumes grow or customer requirements change, BT is able to scale each customer's connectivity quickly and remotely, with no site visit required. This unique, scalable design allows existing customers to connect to new services and trade counterparties in as little as one day, enabling them to begin generating revenues as quickly as possible.

BT in Financial Services

BT has been providing products and services developed specifically for the financial services industry for more than 25 years. By being the leading networked IT services provider to the global financial community, BT combines its core strengths to design and manage solutions that meet customers' complex infrastructure and communications services requirements, enabling financial service firms to reduce costs, improve efficiencies and better serve their customers.

**The BT Radianz model:
Multiple services over a single connection**
