Making a Phone Call

In the Contacts menu tap the name of a contact, then tap the phone icon and the number for that contact you wish to dial.

Go to the Contacts menu to open a list of your device and directory contacts. Search the name of the contact then tap the Call button.

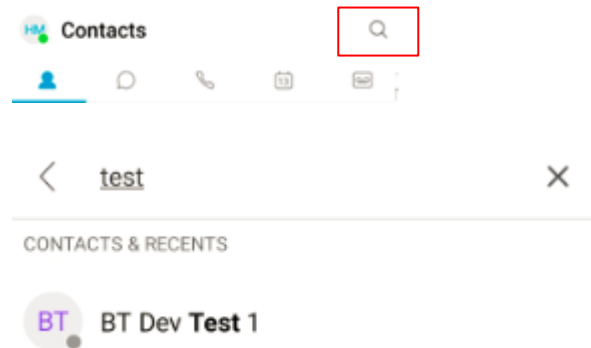

Go to the Keypad menu and enter a phone number in the Search and Dial bar, then tap Call.

Receiving a Call

When you receive a call, a window will pop up with the caller's information.

Select Answer to accept the call, or Decline to send the call directly into your voicemail.

In-call features

Tap the active call to display the in-call features.

You can mute the call, open the keypad or end the call.

In-call features

Tap the **More** button (3 dots) for more in-call options, like Hold, Transfer, Conference.

To End the Call
