

Get the private cloud features you need – and only pay for what you use

Private Cloud – shared from BT gives you private cloud functionality on shared BT infrastructure, so you can tap into compute, storage, networking, and security on a pay-as-you-go basis.

What is Private Cloud – shared?

We're able to offer a multi-tenant cloud environment that you can access and manage through our Compute Management System (CMS).

You can choose from multiple service offerings, including Infrastructure as a Service (IaaS).

That means you can quickly and easily roll out new services, scale up and down – and only ever pay for what you need.

Cloud-based networks are the future.

86%
of organisations are planning to move most or all of their IT infrastructure and applications to the cloud within the next five years.¹

1. BT and Microsoft research: The future of infrastructure and connectivity in a cloud-centric world

The benefits of cloud services on demand

Future-proof architecture

Expand your footprint with secure cloud capacity for specific needs without adding hardware.

Best in class connectivity

Consolidate legacy data centre locations for improved lifecycle management and better cost efficiency.

Flexibility

Start small and then grow as your application requirement increases. And don't worry about technology obsolescence as a tech refresh is part of the service.

Ease of operation and security

We can deploy our service with advanced security controls to meet your organisation's policies.

This includes role-based access in line with your security requirements to the underlying VMware Cloud Foundation components for provisioning and management of the work.

Peace of mind

All of our cloud services come bundled with 24x7 BT service wrap, up to hypervisor. You can also choose to add other services and/or add a managed service, depending on your needs.

A foundation for a strong digital roadmap

Whether it's containers, edge supply chains, multi-cloud workload management or the latest cloud native use cases, shared Private Cloud will provide a strong foundation for a large ecosystem of overlay services.

You can also bundle our cloud services with other hybrid cloud products and add on networking and security solutions. Plus, we can help you build your transformation and growth strategy using our suite of global professional services. The result is an efficient, optimised and cost effective end-to-end hybrid digital infrastructure from one single provider.

Key features

- Multi-tenant resources
- Tenant onboarding in minutes
- Self-service VM provisioning in minutes
- Consumption based pricing resources
- Platform support
- Rapid capacity expansion
- Quotas, storage performance tiers and pre-defined VM sizes
- Optional services available

Why choose BT?

Global reach and scale

We serve more than 4,000 global customers in over 180 countries, satisfying data and application requirements from a performance, security and regulatory perspective around the world.

Vendor and cloud-agnostic

We partner with leading vendors to provide next generation hybrid multi-cloud services and the latest technology innovations, across a wide range of platforms.

Customised solutions

Our customised solutions simplify operations with an unique service experience. With an end-to-end service provider to hold accountable, you can reduce vendor management and support costs. This is provided from our four global service hubs with 7,700 service experts.

World-class security

Our security operations centres around the world give visibility of global threats with are handled by over 3,000 dedicated security experts. We also have access to Interpol and NCSC global intelligence.

An integrated approach

Our cloud experts securely integrate infrastructure, networking services, application platforms, and multi-cloud services to bridge the gap between public and private cloud.

Together, BT and Rackspace create an environment for you to accelerate your digital transformation securely, connecting users, devices, data, applications, across clouds, and geographies.
