BT

The age of the multi-cloud is here.

86%
of CEOs recognise that they face challenges when it comes to digital IT infrastructure[1]

By 2021, at least
75%
of large and global organisations will implement a multi-cloud-capable hybrid integration platform, up from less than 25% in 2018[2]

It's important to go into cloud transformation with your eyes open — so you balance the risks and rewards of the cloud.

89%
of IT decision makers believe legacy systems to be the biggest challenge to digital transformation[3]

82%
of enterprises are facing a gap between user demand and what IT can deliver[4]

Traditional infrastructure doesn't support transformation to the cloud.

Holding back will only make things harder.
With the right roadmap, you can embrace the cloud and its benefits with confidence.

A multi-cloud hybrid environment calls for a new approach to management.

97%
of organisations use cloud services (public, private, or a combination of both)[5]

73%
of companies are planning to move to a fully software-defined data centre within two years[6]

Transform with ease.
Choose a solution that coordinates providers to unlock flexibility, agility, high performance and cost savings.

Through 2022, at least
95%
of cloud security failures will be the customer's fault[7]

49%
of businesses are delaying cloud deployment due to a cybersecurity skills gap[8]

Moving to the cloud increases the threats to your security.

Take a holistic approach to security to protect your whole environment.
Make it integral to your business and reduce the risk of moving to the cloud.

Explore the <u>possibilities of the cloud</u> for your organisation today.
