What's New in Webex Meetings & Devices

Release 42.5

Cisco Collaboration Cloud

April 2022

Cisco Safe Harbor Statement

This presentation contains “forward-looking” statements that involve risks, uncertainties and assumptions. If the risks or uncertainties ever materialize or the assumptions prove incorrect, our results may differ materially from those expressed or implied by such forward-looking statements. All statements other than statements of historical fact could be deemed forward-looking, including, but not limited to, any projections of financial information; any statements about historical results that may suggest trends for our business; any statements of the plans, strategies, and objectives of management for future operations; any statements of expectation or belief regarding future events, technology developments, or enforceability of our intellectual property rights; and any statements of assumptions underlying any of the foregoing.

These statements are based on estimates and information available to us at the time of this presentation and are not guarantees of future performance. Actual results could differ materially from our current expectations as a result of many factors, including but not limited to: the unpredictable nature of our rapidly evolving market and quarterly fluctuations in our business; the effects of competition; and any adverse changes in our indirect channel relationships. These and other risks and uncertainties associated with our business are described in the company’s annual report on Form 10-K. The forward-looking statements in this presentation are made as of the date of the initial publication of this presentation, and we disclaim any obligation to update these statements at any time in the future.

Snapshot

Webex Meetings Suite Feature Snapshot: 42.5 Update

Meetings/Webinar Experience

Webinars

- Scale improvement for email reminder
- Improved Registration page
- Display an image to attendees during Practice Session

Pre-Meeting:

- Webex Scheduler improvements
- Outlook add-in user scheduling experience improvements

In-Meeting:

- Entry and exit beep changes
- Spanish, German, French spoken language transcription
- Breakout support for audio-only users
- Keyboard shortcut change
- Webex Meetings for Chrome (PWA)
- Web App: receive 4K shared content

Post Meeting:

- Redirect

Administration:

- Collaboration restrictions for company users
- Webex Meetings compliance policies BYOD
- Forced authentication before joining Webex Meetings
- Join policy for company meetings with allowed lists
- Breakout Room: disable Broadcast Message

Video Device & Media Enhancement:

- Full HD (1080p) content sharing for motion and video
- Increased fidelity available for VoIP – Fullband
- Increased fidelity available for Music Mode – Fullband

Slido:

- Polls improvements
- New Look for Slido in Webex

Webex APIs

- Bulk registration
- Meeting options
- List meetings by Type

Mobile app

rights reserved. Cisco Public

Android

- Breakout sessions supports audio only user
- Spanish, German, French spoken language transcription available in closed captions
- Display an image to attendees while conducting a practice session
- Join Policy for Internal meetings along with whitelist
- Disable/Enable Broadcast Message for Breakout Sessions at org/user/group level
- User setting for webinar default video layout
- Move Webex Meetings from your desktop to mobile app using a QR code
- Scheduled Meeting - User and devices invited to a meeting should be able to easily join
- Simultaneous Interpretation controls when pairing to a video endpoint
- Webex Meetings for Chrome PWA
- Scheduling: In-app scheduler for Mobile

iOS

- Breakout sessions supports audio only user
- Spanish, German, French spoken language transcription available in closed captions
- Display an image to attendees while conducting a practice session
- Join Policy for Internal meetings along with whitelist
- Disable/Enable Broadcast Message for Breakout Sessions at org/user/group level
- User Setting for default video layout for Webinar
- Move Webex Meetings from your desktop to mobile app using a QR code
- Scheduled Meeting - User and devices invited to a meeting should be able to easily join
- Simultaneous Interpretation controls when pairing to a video endpoint
- Apple WatchOS 8 support
- Scheduling: In-app scheduler for Mobile

Webex App & Devices Snapshot: 42.5 Update

Webex App

General Update

- Home Tab Support (delayed from April)
- Social Sign up
- Allow users to send feedback pre-login
- Tie Contacts tab to the Calling Entitlement
- Set your Pronoun
- Right-to-left Language Support

Messaging

- Forward Messages with content

Calling

- Move screen share to my computer
- GIF/MP4 animated virtual background
- Telephony Do Not Disturb
- Organization Contacts Search
- Disable Share for Calling and IM only Share
- Voicemail Transcription for Webex Calling
- SPAM Call Indication

Devices

RoomOS May

- Self-Hear Microphone Tests (delayed from April)
- Simultaneous Interpretation
- Spoken Language
- Embedded Web Apps
- RoomOS 11 UI

Announcements

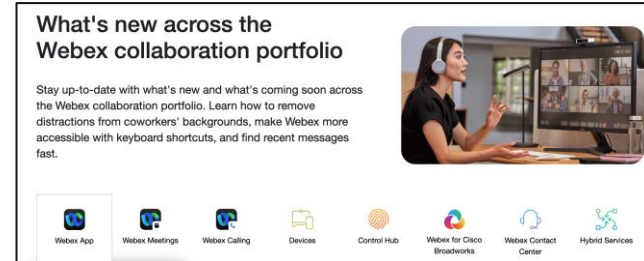

Monthly Release Communications Changes

In June, Cisco will stop sending Webex Meetings monthly release email to customers and partners.

Instead, release info will be published in the What's New landing page that covers the entire Webex portfolio.

So, please do the followings to keep up with the release info

- Bookmark the What's New landing page, <https://essentials.webex.com/whats-new.html>
- Subscribe to the articles on help.webex.com that are relevant to your org to receive the RSS feed for any update
- Check the calendar for release schedule, service update and scheduled maintenances

End of Life for Productivity Tools

42.6 update will be the last release of Productivity Tools.

Productivity Tools will continue to work after June till Microsoft blocks it but Cisco will no longer provide update and bug fixes.

Customers should migrate Productivity Tools to Webex Scheduler (M365 add-in). For migration detail, check out this [help article](#).

This announcement applies to both Latest and Slow channel customers.

Deprecation of Creating New Site Admin (SA) Managed Sites

Today, 2 options are available for paid customers to create a new site – SA or Control Hub managed site

Our goal is to have all Meetings sites managed in Control Hub. Tool has been available to migrate site management from SA to Control Hub

By mid-2022, Cisco will close the feature gaps between the 2 types of site and at that time, SA managed site option will be deprecated

Exact date for deprecation will be announced

42.2.5 Slow Channel is now GA

Key Highlights for 42.2.5

- New skin tones and new reactions
- Cohosts can manage invitations and registration
- Administrator controls for virtual backgrounds
- Customizable email template and setup reminder
- Lobby improvements
- New virtual backgrounds
- Customer Communications: [Click Here](#)
- Release Notes: [Click Here](#)

Webex Webinars

Scale Improvement for Email Reminders

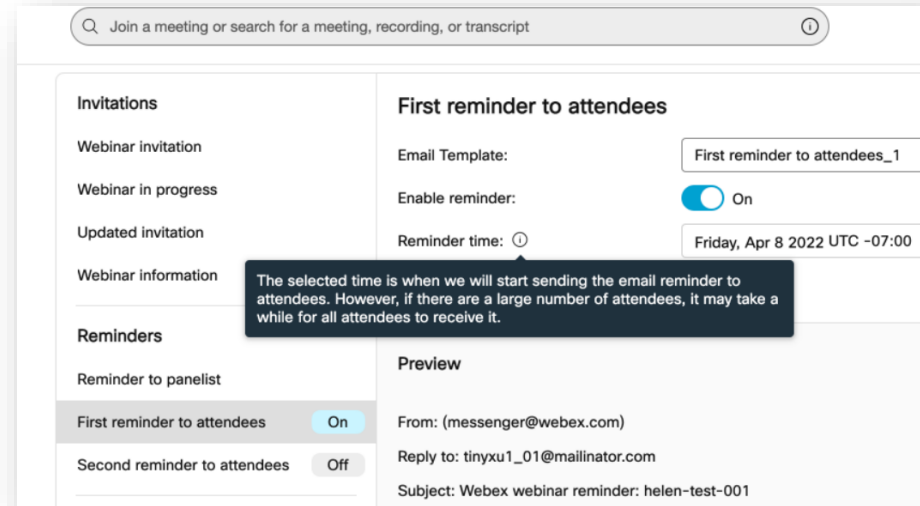

for 25,000, 50,000, 75,000 and 100,000 licenses

Today, organizations or sites with licenses of 10,000 and below can schedule email reminders to attendees.

Starting with the 42.5 update, organizations or sites who have more than 10,000 licenses can also schedule email reminders.

To support a large volume of emails, the reminder can be scheduled to be later than 12 hours prior to the start time.

This feature also supports webcast view for attendees.

42.5

Available at GA

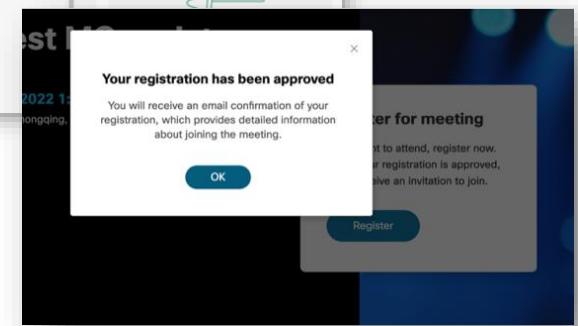

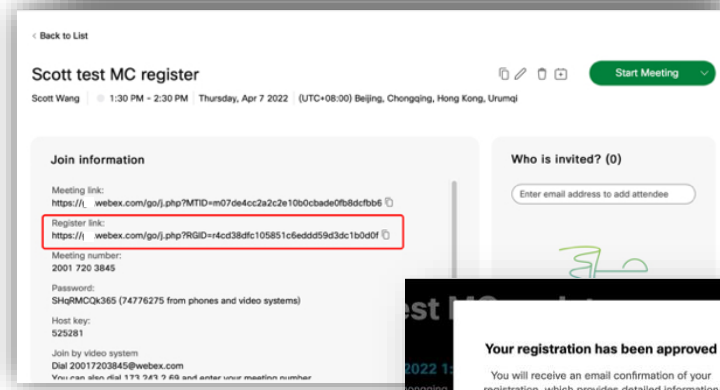

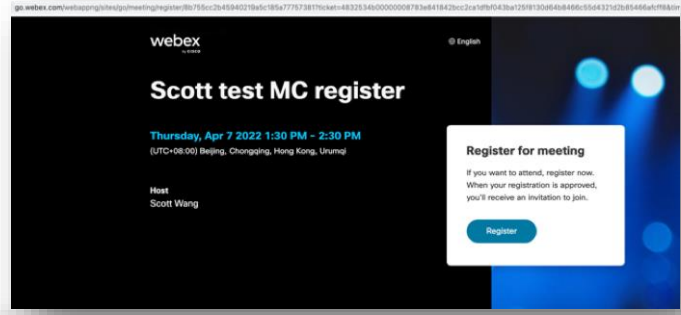

Improved Registration Page

With 42.5, during attendee registration, they see the meeting title, time, and host.

- Clear information

No more Meeting password in the Registration page since you don't need that information during registration.

If you're the host, you also get a registration link that you can copy to the Meeting information page.

42.5

Independent Schedule

Display an Image to Attendees During Practice Session

Host can upload an image when webinar set up.

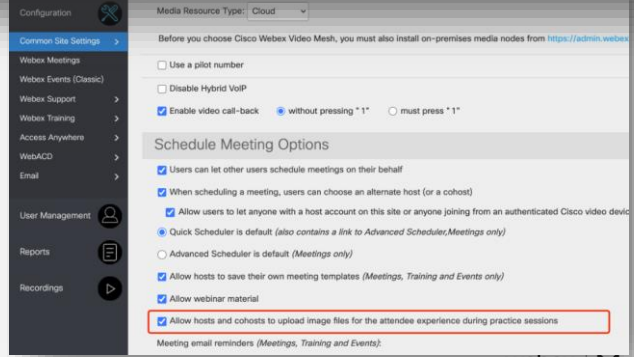

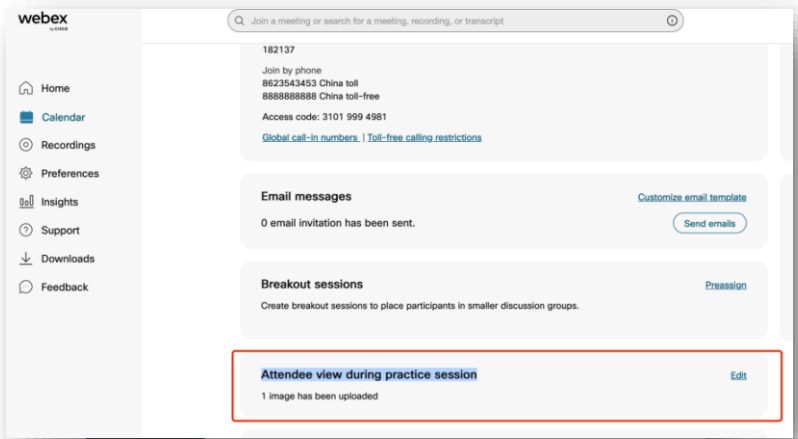

During the practice session, attendees will see the image. They can change how it's fit to their window

ON by default

Site Admin/control Hub Admin can disable the option

Note:

- This feature doesn't support webcast view.
- The ability to upload other file types will come in a later update.

Webex Scheduler improvements

For Meetings and webinars

Scheduler on website for Meetings and Webinars

- A new section called **Security** has been added and all scheduling options related to security are moved here. This includes passwords for meetings and webinars.
- Tooltips are added to most scheduling options including options under **Attendee privileges** and **Meeting options**.
- Agenda is now part of the main or basic scheduling flow instead of under **advanced options**.

Available at GA

Outlook Add-in User Scheduling Experience Improvements

for on-premises exchange environments

Improvements for users of the Outlook add-in on-premises Exchange environments - scheduling experience.

With 42.5, users with Hybrid Calendar deployed no longer need to manually click **Update** to update Webex Meetings, when scheduling changes were made via Outlook

- These changes sync automatically

Additionally, for all on-premises Exchange users, Outlook events are no longer auto-saved if a Webex Meeting is added.

- This brings back the Outlook modal for customers that want to see it.

Webex Meetings In-Meeting Experience

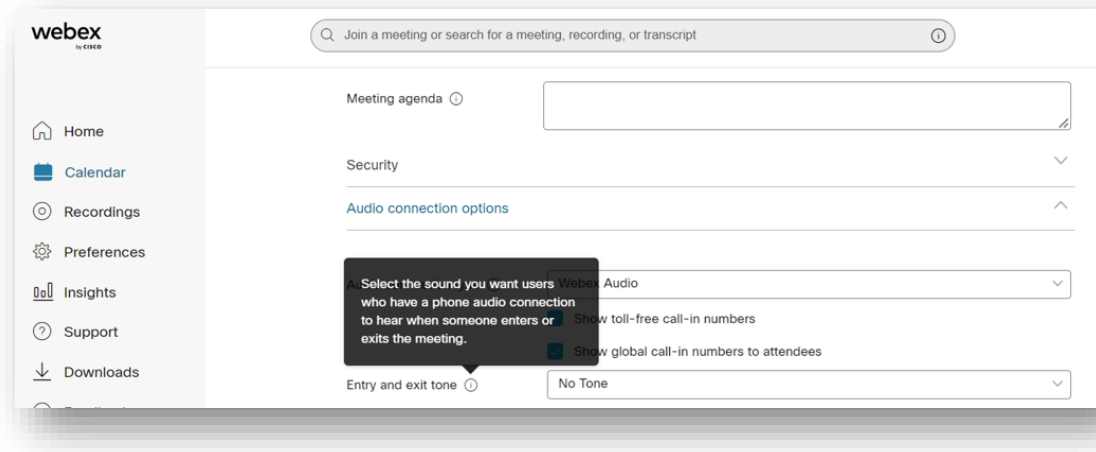

Entry and Exit Beep Changes

For Phone audio connections

For existing sites that have entry and exit beep turned on, phone users continue to hear the beep, BUT it is turned off for computer audio users.

All new sites have this feature turned off by default.

The message on the scheduler page has also been updated

Spanish, German, French Spoken Language Transcription

Breakout Room Support for Audio-only Users

For PSTN Participants

A user joining a meeting using Audio only (PSTN), can now be placed in a breakout session. This feature is available for meetings desktop and mobile.

Attendee experience:

- Attendee is prompted when they are moved to a breakout. They can be moved immediately or join later by pressing *2.
- Attendee can return to main session and rejoin the breakout by pressing *2.
- When the breakout session is closed, attendee is warned and then moved to the main meeting.

Host experience:

- An audio-only host, when assigned to a breakout session by a cohost, can join the breakout session later by pressing *2, regardless of selected settings.
- They can also return to the main session and rejoin the breakout session by pressing *2 regardless of the selected settings.
- Host is warned with an audio prompt when a cohost moves them to another breakout session.
- When a cohost closes the breakout sessions, Host is warned and then automatically moved to the main meeting.

42.5 Available at GA			

Breakout Room Support for Audio-only Users

Limitations

In meetings, attendees cannot view or choose the breakout session to self-join.

- They must be assigned to a breakout session by the host or cohost.

This feature is not supported for attendees in Webinars, only supported for panelists.

If some participants using a Meetings desktop app version earlier than the current version, audio-only users aren't listed in the Participant of the breakout session.

Only following DTMF tones are available inside the breakout for

- Host: *2 , *6, **
- Attendees: *2, *3, *6, **

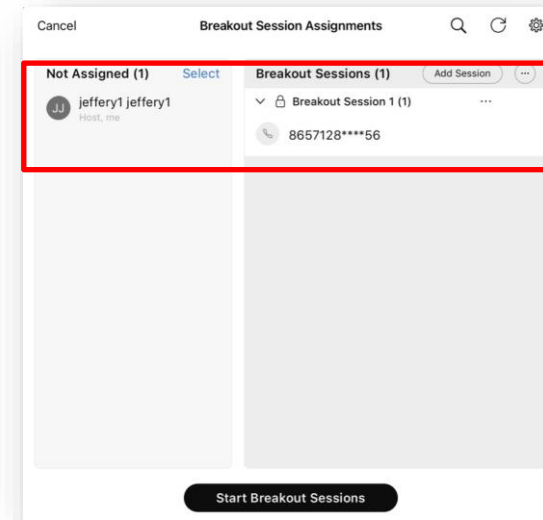

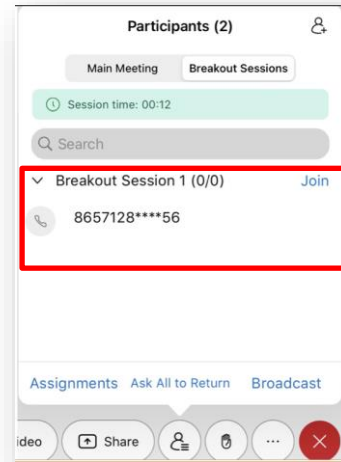

M	W	FedRAMP	VDI
✓	X	✓	

Breakout Room Support for Audio-only Users

Android & iOS client can assign/switch/move audio only user to BO for MC and Webinar.

BO panelist can show audio only user

Introducing People Focus (Beta)

Moved from March

People Focus: new way to use Grid view, that maximizes screen space by using AI to dynamically crop videos to focus on the individual, rather than their surroundings.

This gives you a better **face-to-face** experience with the people you are meeting with, regardless of how the person is positioned in front of their camera, making you feel more connected. Click **Layout** to turn on People Focus.

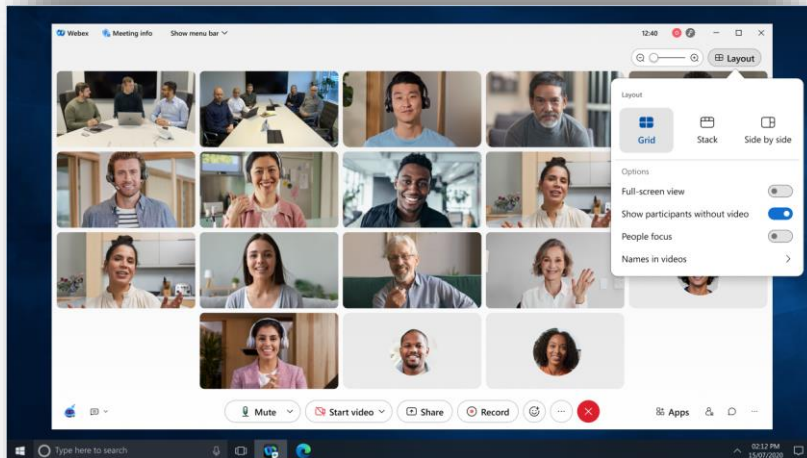

Video cropping is supported for participants using Mac, Windows, Desk Series Devices, and Board Series Devices.

Current limitations in this Beta:

- Participants using the mobile app, web app, or Room Series Devices videos don't support cropping at this time.

42.5
Available at GA

Webex Meetings for Chrome (PWA)

The Webex Meetings web app is now available for download as a PWA (Progressive Web App) for ChromeOS in the Google Play store.

This makes it easy for Chromebook users to access Meetings directly from their desktop, without having to go through the browser.

Similarly, this provides you with more flexibility to manage services and apps for your users.

Note: If you currently have the *Meetings Android App* installed on your Chromebook, you will need to uninstall the Android app first, in order to download the PWA.

Win	Mac	iOS	Android	We b	M	W	FedRAMP	VDI
✓	✓	✗	✗	✗	✓	✓	✓	

42.5
Available at GA

Web App: Receive 4K Shared Content

When 4K content is being shared in a meeting or webinar, users that joined through the web app can now see that content in 4K (rather than being downgraded to 1080p).

Slido Update

more product details see <https://community.sli.do/product-news-23>.

Polls Improvements

More possibilities of interactions with participants

Slido rating poll improvements

Today, Slido current star rating poll is quite one-dimensional in terms of the questions

In 42.5, adding the capability to

- change from stars to emojis
- add low and high score label

Better attendee experience with images in Slido polls

In the Webex-Slido integration, attendees can zoom in on a picture that is inserted into a Slido poll.

42.5
Independent deployment

Increased Audio Fidelity Available for VoIP

Fullband audio

Site administrators can ask to enable Fullband audio for their site.

This enables higher fidelity audio for VoIP users for the highest level of audio quality available on the Webex service.

- Same level of audio we use on Webex devices

OFF by default – contact your CSM

Takes more network bandwidth.

Win	Mac	iOS	Android	We b	M	W	FedRAMP	VDI
✓	✓	X	X	X	✓	✓	✓	

42.5

Available at GA

Increased Audio Fidelity Available for Music Mode

Fullband audio

Music Mode now uses Fullband audio quality on Mac and Windows Meetings app, by default. By default, Music Mode sessions are encoded using up to Fullband audio quality.

Administrators that require the use of lower quality audio for Music Mode can request the feature toggle to be disabled for their site.

With this toggle disabled, Music Mode operates up to Superwideband audio fidelity on desktop clients.

Note: available for slow channel customers

Collaboration Restrictions for Company Users

Via Control Hub settings templates

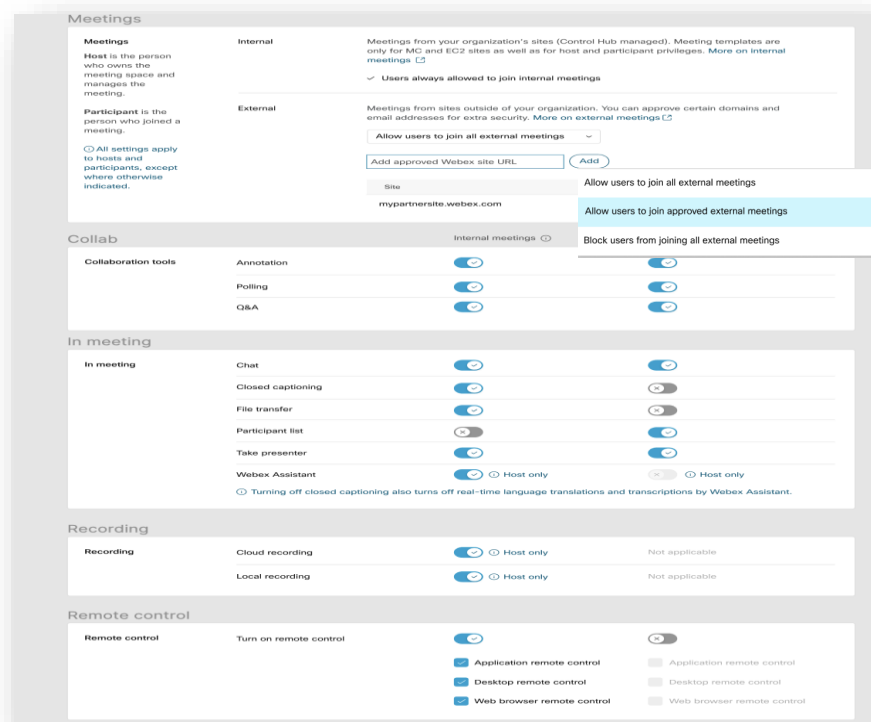

Today, IT admin can block users from joining meetings hosted on external sites - org level only

In 42.5, leverage the new “settings template”

- Can be applied to a user or a group of user
- applicable to company user joining **internal/external** meetings.

Collaboration restriction toggles: More than 20+ control features

Users are provided with appropriate messaging while using Webex Meetings based on their company policy.

Win	Mac	iOS	Android	We b	M	W	FedRAMP	VDI

Webex Meetings Compliance Policies for Bring Your Own Device (BYOD)

IT administrators can now prevent users from joining company meetings from a BYOD.

Users can join company meetings using BYOD only if a registry key or token is detected on that device.

Without registry key, the BYOD block policy will apply to claimed email domain

For more information on tokens and registry keys and how to configure them, see [Collaboration restrictions for Webex Meetings in Control Hub](#).

42.5

Available at GA

Forced Authentication Before Joining Webex Meetings

For Control Hub admins

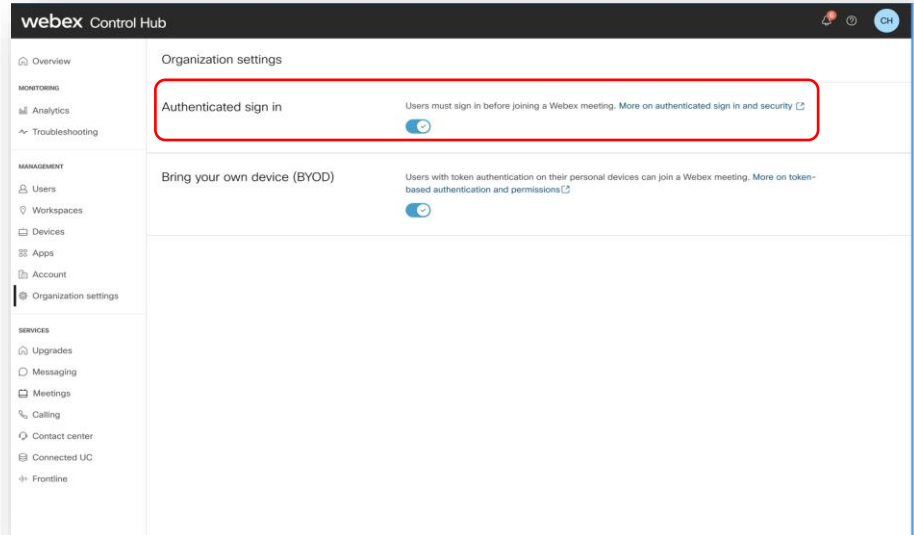

Admins can now lock the company device to allow only authenticated company users to join meetings using that device.

Feature applicable to users joining internal or external meetings

Feature leveraging the registry key and token that have already been introduced.

For more information on tokens and registry keys, see [Collaboration restrictions for Webex Meetings in Control Hub](#).

Without the registry key, if **Authenticated Sign-in** is **ON**, it applies to the user trying to join meetings with a claimed email address.

Win	Mac	iOS	Android	We b	M	W	FedRAMP	VDI
✓	✓	✓	✓	✓	✓	✓	✓	

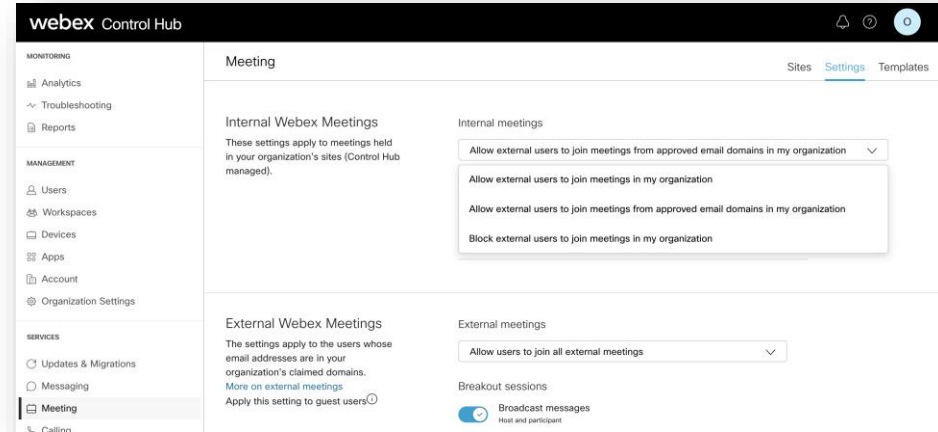

42.5
Available at GA

Join Policy for Company Meetings with Allowed Lists

For IT admins

IT administrators can now set rules on who can join company meetings.

- Choice to allow anyone to join internal meetings or choose to create an allowed list of domains.
- Only users authenticated on that domain can join internal company meetings.

Policy can be applied:

- At the organization level
- User and group level using the settings template in Control Hub.

Note: this is not applicable to PCN & video devices

Breakout Room: Disable Broadcast Messages

For Site Admin

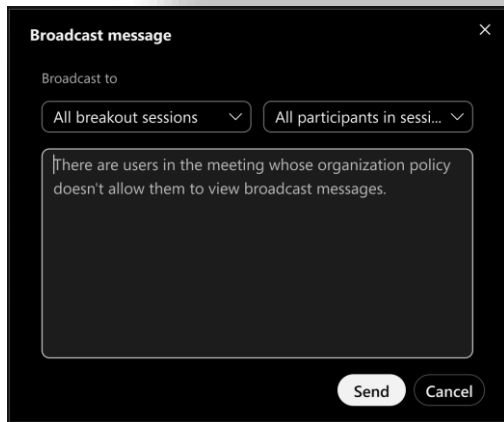

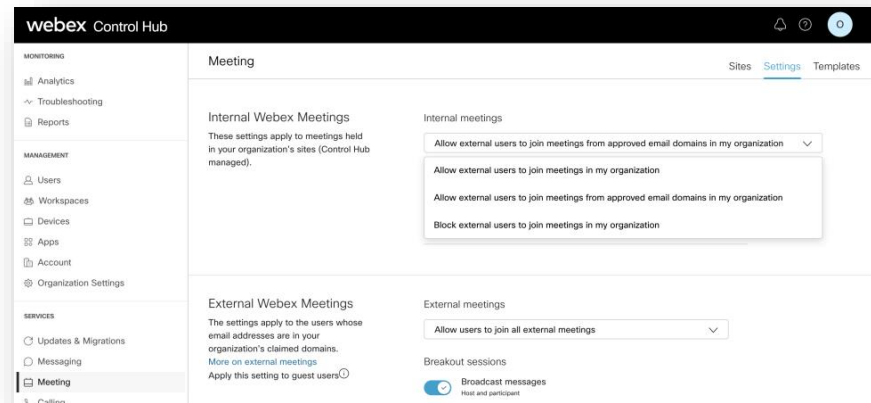

Today, Broadcast message capability in Breakout session is ON by default and cannot be disabled

With 42.5, Admin can disable Broadcast Message

- Using control hub templates for meetings and webinars.
- Available at the user, group, or org level.

When feature disabled for the user, the user as a hosts or cohost won't be able to use the Broadcast Message feature in breakout rooms.

The host and cohost are notified of the feature limitations.

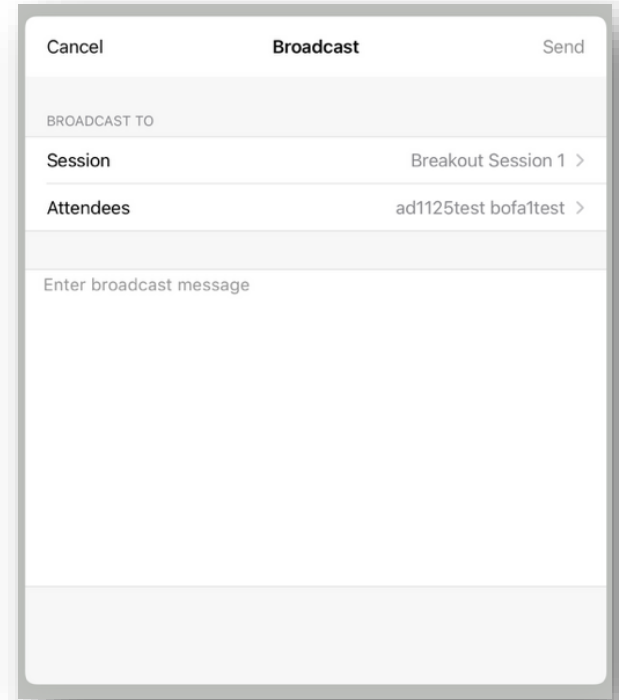

Breakout Room: Disable Broadcast Message

Android & iOS apps show displays different information based on the user/group messaging privileges.

Mobile client hides the broadcast menu or alerts the host/cohost when this feature is disabled by site admins.

Webex Meetings API

AGENDA:

Webex APIs: Bulk Registration

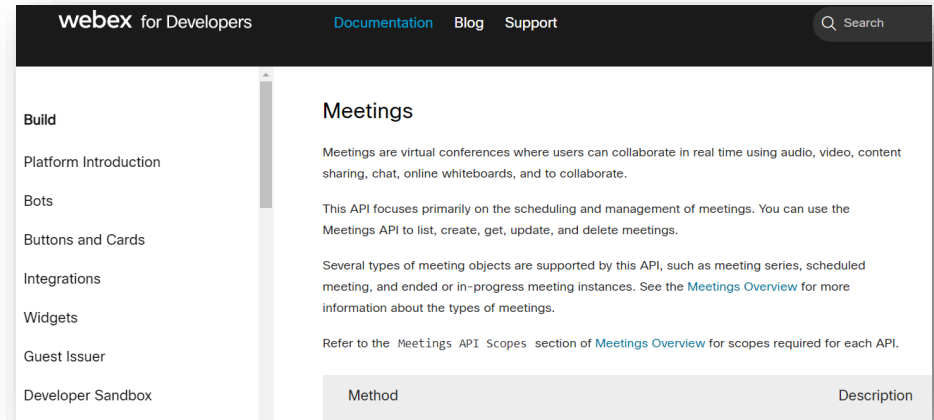

For Webinars and Meetings

Currently, when applications use Webex Meetings APIs to register for a specific participant to join a Meeting or a Webinar, it must happen on a participant-by-participant basis.

In 42.5, this API is updated to allow bulk registration of participants for more efficient use of the APIs.

Visit the updated API:

<https://developer.webex.com/docs/api/v1/meetings/register-a-meeting-registrant>.

M	W	FedRAMP	VDI
✓	✓	✓	

42.5
Available at GA

Webex APIs: Meeting options

Updated Webex Meetings management APIs to allow applications to configure meeting options.

Meeting options are used to define the features you can use in the meeting.

- For example, if a certain use case requires that you can't view and use chat during a meeting or allow you to turn on closed caption.

Meeting options are available for create and update meetings and are a part of listing meetings.

To view the related APIs, please visit: <https://developer.webex.com/docs/api/v1/meetings>.

The screenshot shows the 'webex for Developers' documentation page for the 'Meetings' API. The page has a dark header with 'webex for Developers' on the left, 'Documentation', 'Blog', and 'Support' in the center, and a search bar on the right. A left sidebar lists navigation items: 'Build', 'Platform Introduction', 'Bots', 'Buttons and Cards', 'Integrations', 'Widgets', 'Guest Issuer', and 'Developer Sandbox'. The main content area is titled 'Meetings' and contains the following text: 'Meetings are virtual conferences where users can collaborate in real time using audio, video, content sharing, chat, online whiteboards, and to collaborate.' 'This API focuses primarily on the scheduling and management of meetings. You can use the Meetings API to list, create, get, update, and delete meetings.' 'Several types of meeting objects are supported by this API, such as meeting series, scheduled meeting, and ended or in-progress meeting instances. See the [Meetings Overview](#) for more information about the types of meetings.' 'Refer to the [Meetings API Scopes](#) section of [Meetings Overview](#) for scopes required for each API.' Below the text is a table with two columns: 'Method' and 'Description'.

M	W	FedRAMP	VDI
✓	✓	✓	

42.5
Available at GA

Webex APIs: List Meetings by Type

The Webex Meeting list API is updated to allow applications to list meetings by their type.

To view the related APIs, please visit: <https://developer.webex.com/docs/api/v1/meetings/list-meetings>

The screenshot shows the 'List Meetings' API documentation page. The page has a dark header with navigation links for 'Documentation', 'Blog', and 'Support', a search bar, and 'Log in' and 'Sign up' buttons. The main content area is light gray and contains the following text:

List Meetings

Retrieves details for meetings with a specified meeting number, web link, meeting type, etc. Please note that there are various products in the [Webex Suite](#) such as `Meetings` and `Events`. Currently, only meetings of the `Meetings` product are supported by this API, meetings of others in the suite are not supported.

- If `meetingNumber` is specified, the operation returns an array of meeting objects specified by the `meetingNumber`. Each object in the array can be a scheduled meeting or a meeting series depending on whether the `current` parameter is `true` or `false`. When `meetingNumber` is specified, parameters of `from`, `to`, `meetingType`, `state`, `isModified`, `participantEmail` and `siteUrl` will be ignored. Please

On the right side of the page, there are two tabs: 'Try it' (active) and 'Example'. Below the tabs is a code editor showing the following REST client request:

```
GET /v1/meetings?{meetingNumber,webLink,roomId}
```

Below the code editor, there is a warning icon and the text 'Log in to try the API.' Below that, there are sections for 'Header', 'Content-Type' (set to `application/json`), and 'Authorization' (with a toggle for 'Use personal access token').

Webex Mobile App

Mobility: Program Milestones

These dates, and features shown, are still subject to change.

Milestone	Android	iOS
Submit to Store	May. 7, 2022	May. 7, 2022

- * Android apps typically appear in the store within a few days of the submit date.
- * * Apple takes longer to approve apps, so we cannot provide a specific date/estimate.

Android 42.5

- Breakout sessions supports audio only user
- Spanish, German, French spoken language transcription available in closed captions
- Display an image to attendees while conducting a practice session
- Join Policy for Internal meetings along with whitelist
- Disable/Enable Broadcast Message for Breakout Sessions at org/user/group level
- User setting for webinar default video layout
- Move Webex Meetings from your desktop to mobile app using a QR code
- Scheduled Meeting - User and devices invited to a meeting should be able to easily join
- Simultaneous Interpretation controls when paired to a video endpoint
- Webex Meetings for Chrome PWA

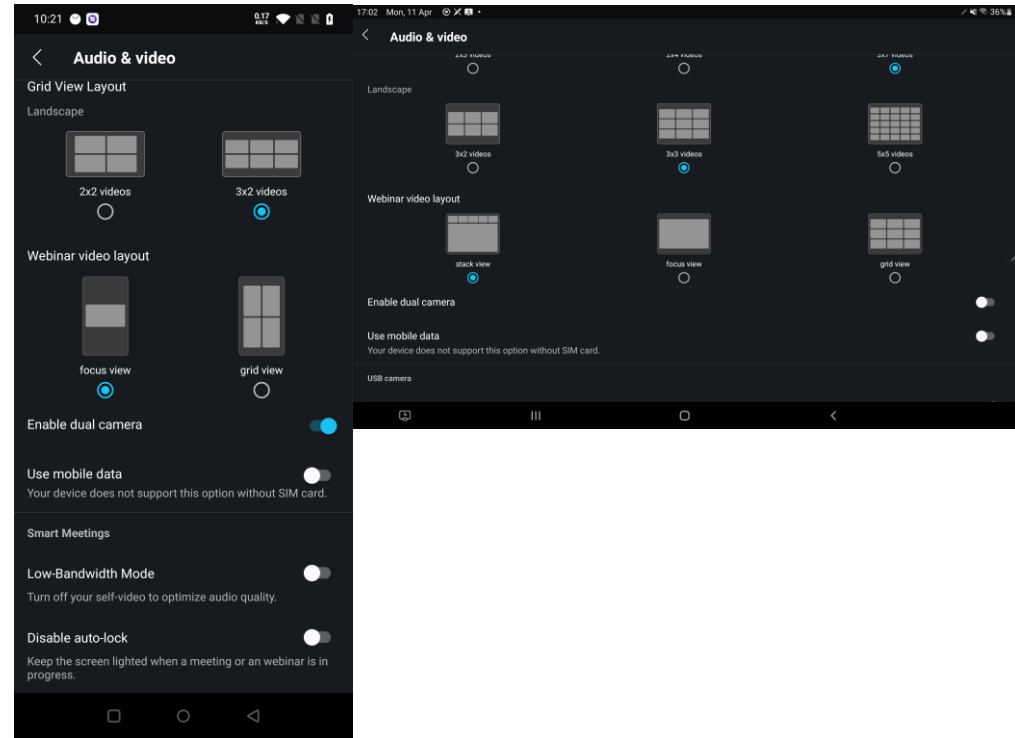

iOS: 42.5

- Breakout sessions supports audio only user
- Spanish, German, French spoken language transcription available in closed captions
- Display an image to attendees while conducting a practice session
- Join Policy for Internal meetings along with whitelist
- Disable/Enable Broadcast Message for Breakout Sessions at org/user/group level
- User Setting for default video layout for Webinar
- Move Webex Meetings from your desktop to mobile app using a QR code
- Scheduled Meeting - User and devices invited to a meeting should be able to easily join
- Simultaneous Interpretation controls when paired to a video endpoint
- Apple WatchOS 8 support
- Scheduling: In-app scheduler for Mobile

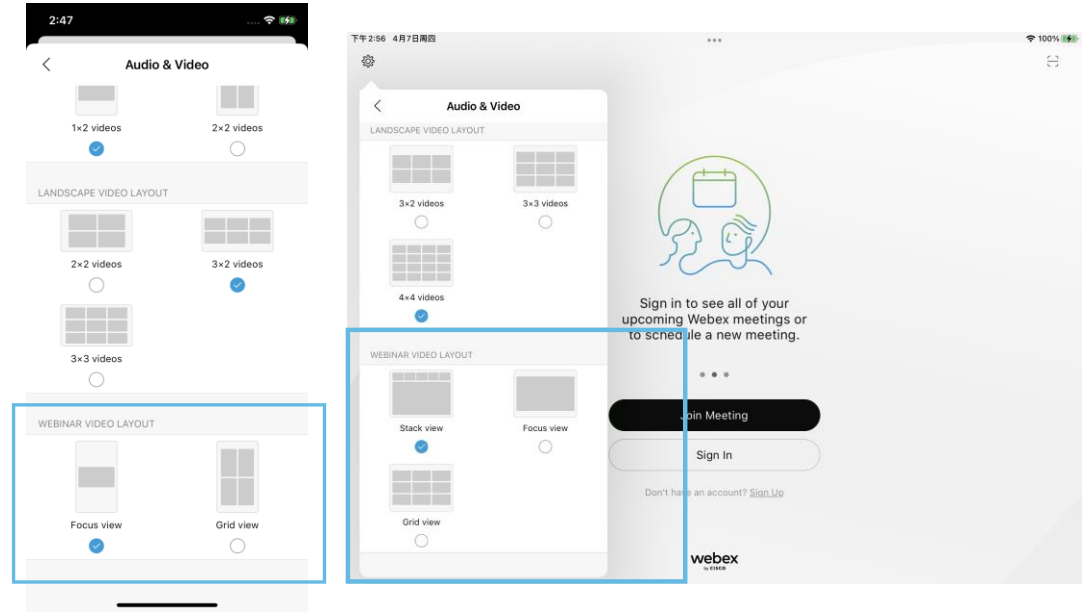

User Setting for Webinar Default Video Layout

- The default video layout for webinars on tablet is Stack view and for phone is Focus view.
- Users can change their webinar default layout by going to Settings> Audio & video settings menu.

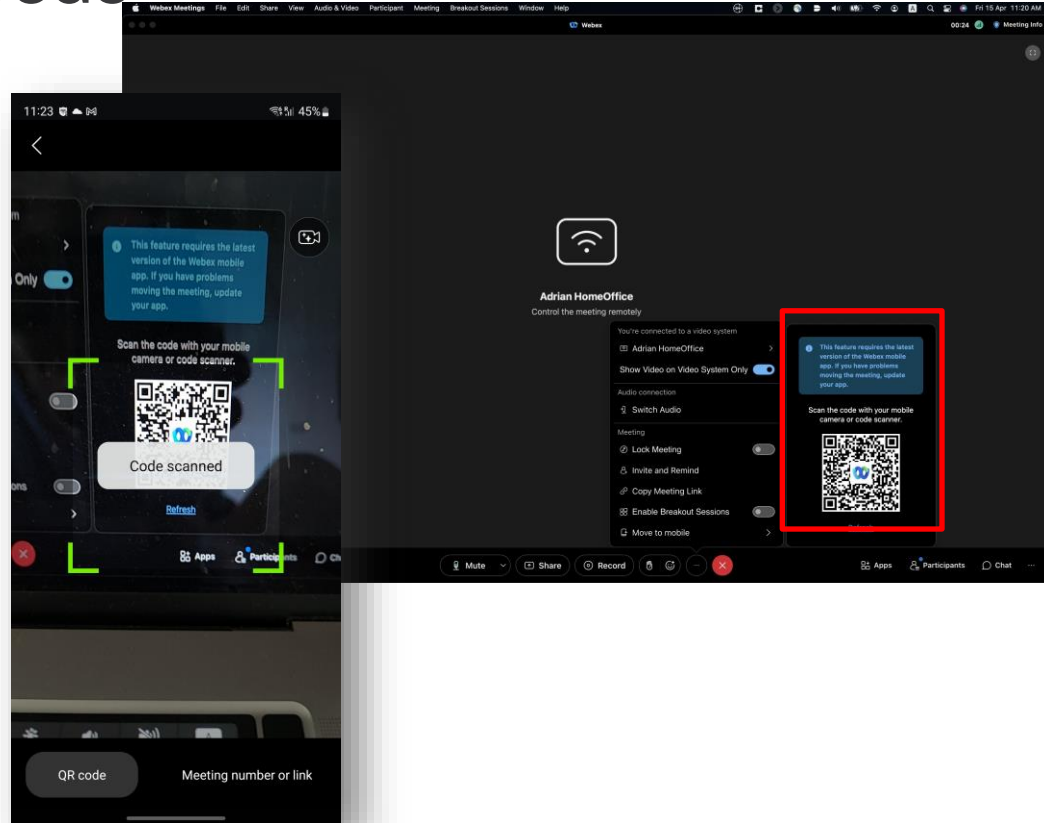

User Setting for Default Video Layout for Webinar

- Before: default layout for attendees when they join a Webinar is as follows:
iPad/iPhone: Grid View.
- Now: default layout for webinar
 - iPad: Stack View
 - iPhone: Focus View
- Users can change this default layout in settings menu.
- Note: Webinar include classic event and new event.

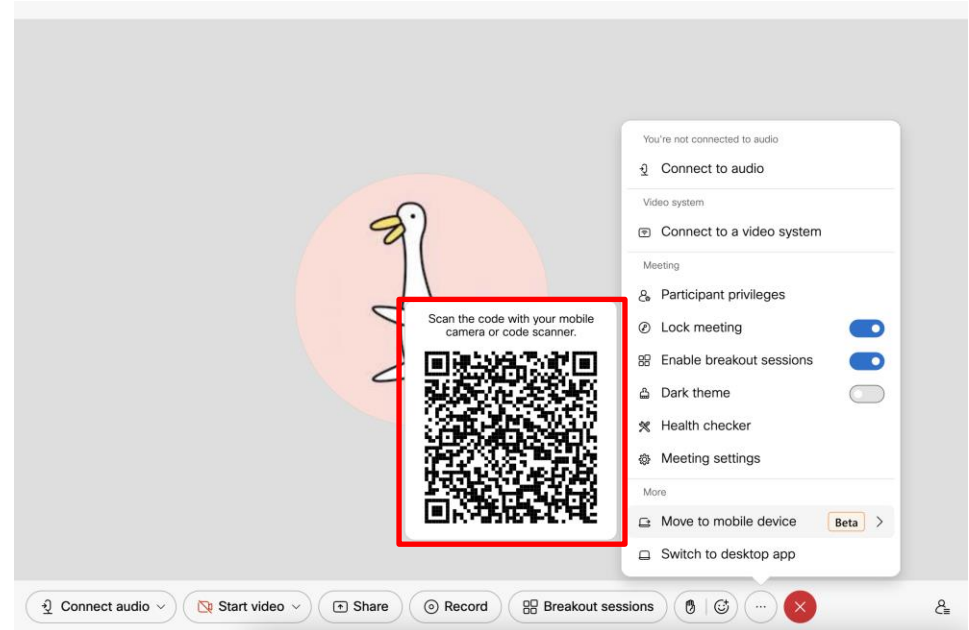

Move Webex Meetings from your Desktop to Mobile app Using a QR Code

- User can move meeting to Android if user is in a Webex meeting on desktop.
- Users can scan the QR code using their system camera and move their meeting to Webex Meetings Android app without disrupting or disconnecting the meeting.

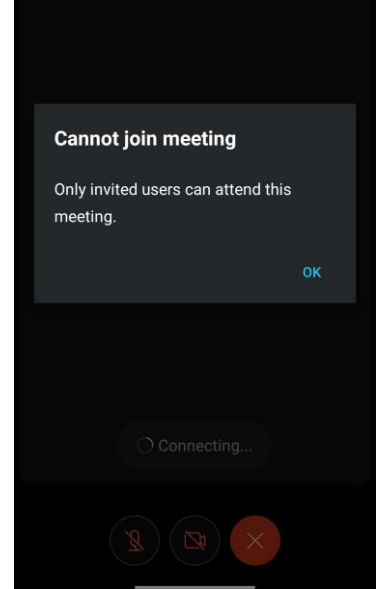

Move Webex Meetings from your Desktop to Mobile app Using a QR Code

- User can move a meeting to iOS if user is in a Webex meeting on desktop
- iOS user can use iOS system camera to scan QR code to move the desktop app meeting to iOS.
- After iOS user join meeting successfully, the desktop user (same account as iOS user) will leave the meeting on desktop.

Scheduled Meeting - User and Devices Invited to a Meeting Should be able to Easily Join

- Add three options for invited users in a scheduled meeting, Android users will be controlled by those options when joining that meeting.
 - Can join the meeting directly
 - Wait in the lobby until the host admits them
 - Can't join the meeting – Android client shows one prompt for the user.

M	E	FedRAMP	VDI
✓	✓	✓	

Simultaneous Interpretation Controls when Paired to Video Endpoint

- Android and iOS Client can remotely control the Simultaneous Interpretation function on a device

M	E	FedRAMP	VDI
✓		✓	

Apple WatchOS 8 Support

- Watch App support with WatchOS 8
 - Always-On (Apple Watch Series 5 or later)
 - Assistive Touch (Apple Watch Series 4 or later)

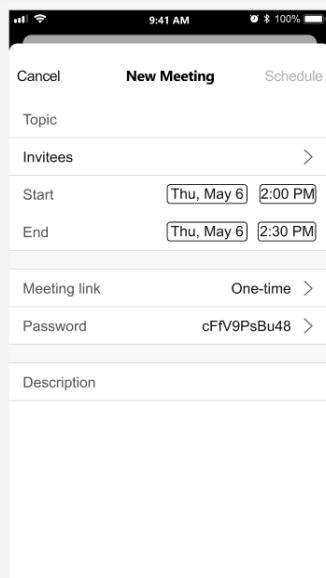

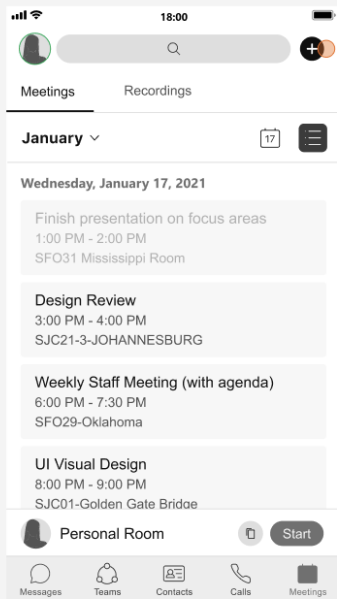

Always-On

Scheduling: In-app scheduler for Mobile

Webex app only!

Schedule a Webex meeting inside or outside a space from mobile Webex app.

- Introducing an in-app scheduler for iOS and Android mobile Webex app.
- Schedule from either inside or outside a space.
- Schedule a single instance PMR or one-time link Webex meetings from outside space.
- Invite people and view their free/busy status.
- Update or delete meetings from mobile.

Availability Key

02 Recap RoomOS April

Released in RoomOS April

- WebEngine – Kiosk mode
- Delayed
 - Self-hear Microphone Tests

03 New Features RoomOS May

RoomOS May

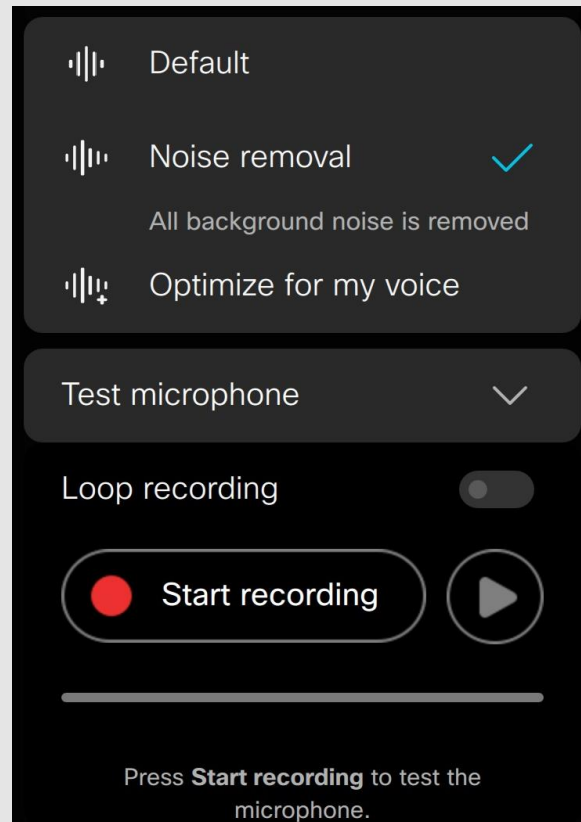

- Simultaneous Interpretation
- Spoken Language
- Embedded Web Apps

- Delayed from April (Enabling in May)
 - Self-hear Microphone Tests

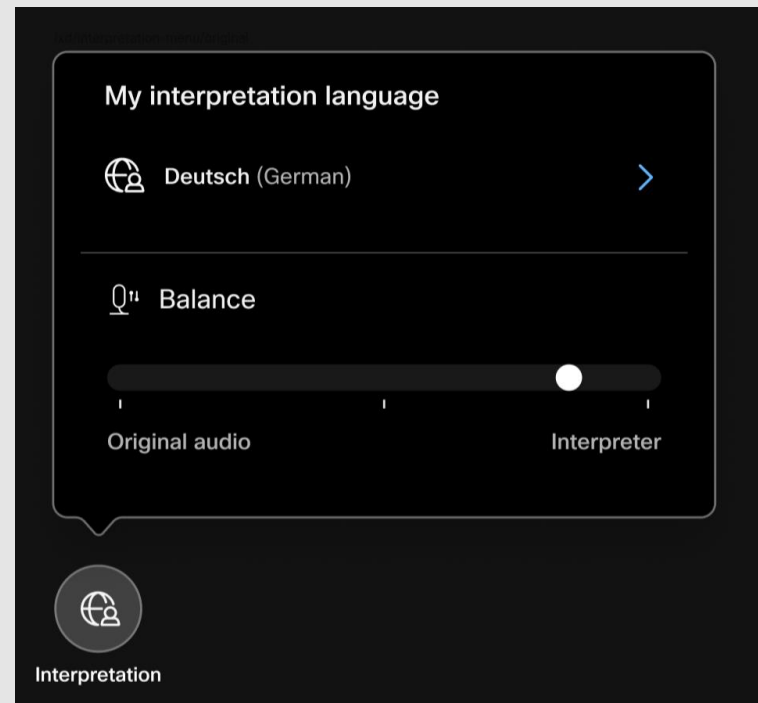

Self-Hear Microphone Tests

- Working from home
 - Ensure Noise Removal (BabbleLabs) feature really removes background noise like a barking dog or a carpenter working near by
 - Help gain confidence in these technologies
- In the meeting room
 - Test how many microphones you need in the room, or you want to check your voice quality.
 - You can activate the loop playback (aka continuous) mode and walk around in the room and listen to the sound quality from the mic pickup.
- Requires RoomOS 11 experience
 - Not available on Touch10 or Navigator
 - Board and Desk Series only for now
 - Controller UI is coming soon

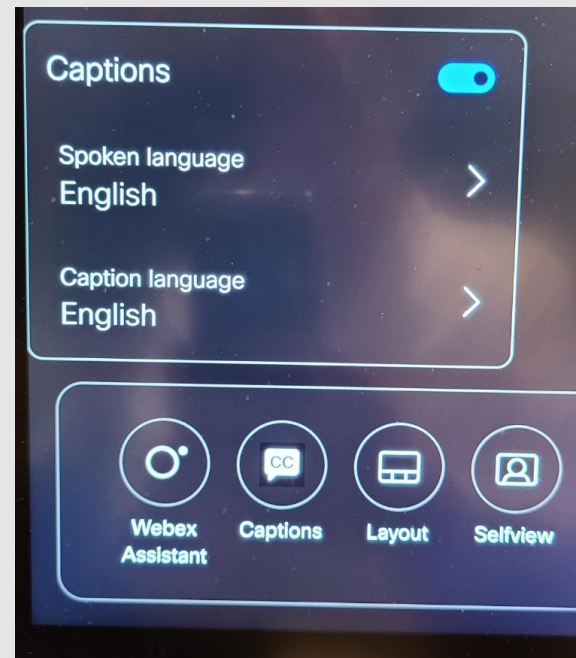

Simultaneous Interpretation

- RoomOS 11 Only
 - No support for DX, MX, or SX
 - No support for SIP Join (cloud join only)
 - No support for New Events, yet...
- Interpreters invited to meeting to provide the translation service
- Attendee/user selects desired language and balances audio between original and interpreter
- Risk to release
 - Device-side is ready
 - Backend still in progress

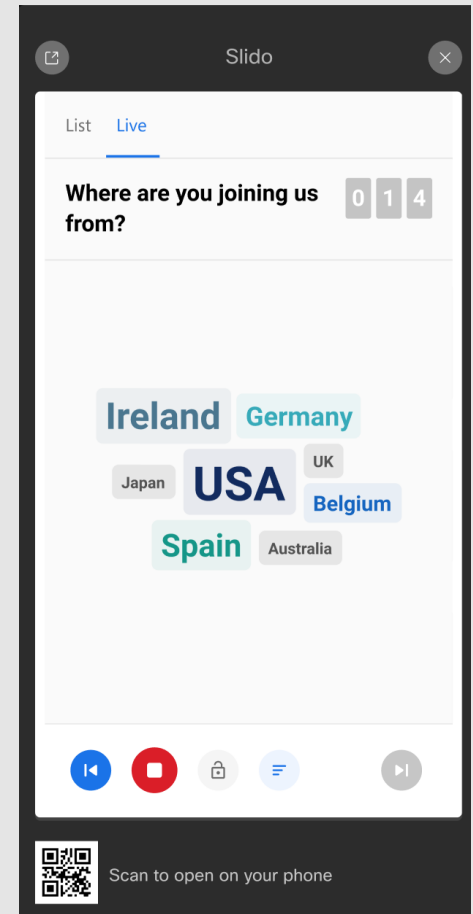

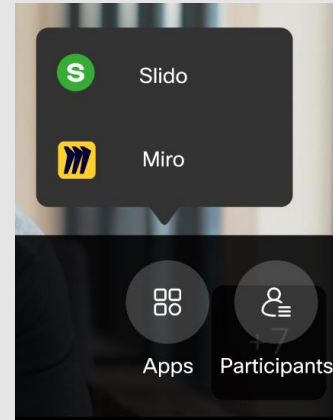

Spoken Language

- RoomOS 11 Only
- Allows non-English CC and Transcription
- Supported Languages/Dialects
 - Taiwanese Mandarin
 - English (Australia)
 - English (US)
 - English (UK)
 - French (France)
 - German
 - Italian
 - Korean
 - Portuguese (Brazil)
 - Hindi
 - Polish
 - Dutch (Belgium)
 - Dutch (Netherlands)
 - Spanish (Spain)
 - Spanish (Mexico)
 - Spanish (US)

Embedded Web Apps

- Supported on Desk and Board Devices
 - RoomOS 11 only
 - No Desk Hub support
- Allow devices to participate with Embedded apps
 - Apps initiated by Webex app
 - Device will automatically open and log you in to the application
 - Start collaborating immediately
- Switch between meeting and/or other embedded apps
- Apps at launch:
 - Slido, Miro, Mural
- Only personal mode
 - Shared-mode later

RoomOS 11 UI

- Currently available on Board and Desk Series
 - Cloud-registered or Webex Edge for Devices
- Org-level Enablement
 - Control Hub – Devices – Settings – Enable RoomOS 11 UI Experience as default
- Device Level Enablement
 - Control Hub – Devices – <Select Device> – All Configurations
 - UserInterface > Concept > Tablet > Compositor (From Desktop)
 - Device needs to have Cloud Upgrade Mode enabled
- Software release will still show RoomOS 10.x.x.x
 - Will move to 11.x.x.x once Room systems are added

Webex App Update

DELAY - Home Tab

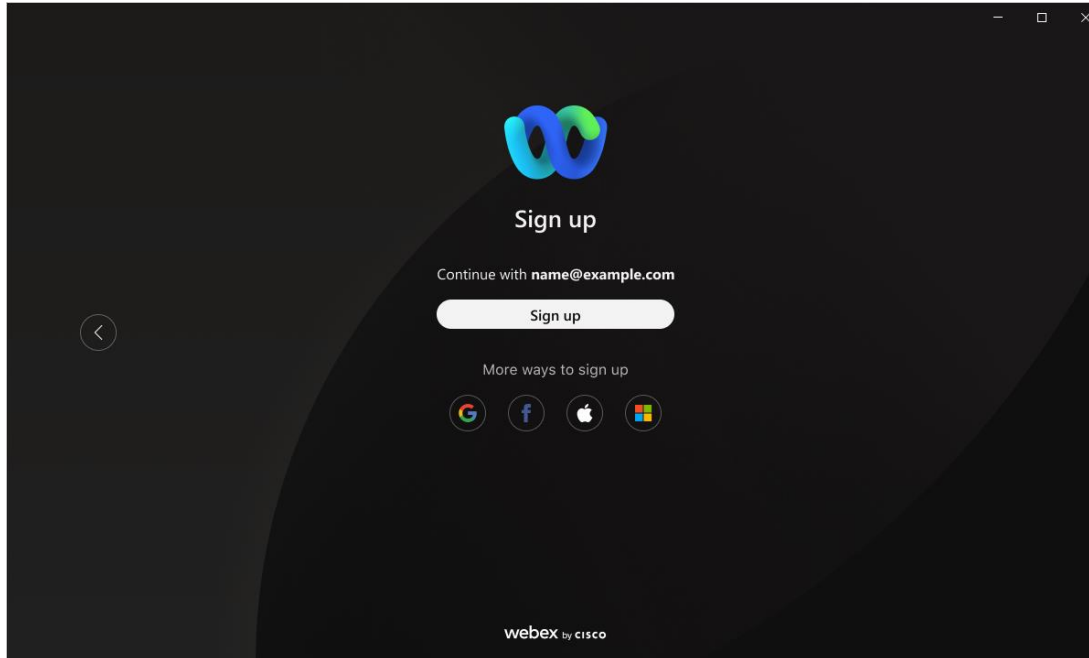

Win	Mac	iOS	Android	Web	FedRAMP	VDI
✓	✓	✗	✗	✗	✗	✓

- Home Tab coming to Desktop
 - Mobile and Web apps coming at a later stage
- Can be set as default tab
- Provides shortcuts to frequently used actions
 - List upcoming meetings
 - Initiate 1:1 or space chats
 - AI based relevant people connection recommendations with escalate to message/meet buttons
- Getting Started and Product Highlights for feature discovery

Social Sign-up

Win	Mac	iOS	Android	We b	FedRAMP	VDI
✓	✓	✓	✓	✓	X	X

Online users will be able to sign up and log in using a 3rd party authentication like the following:

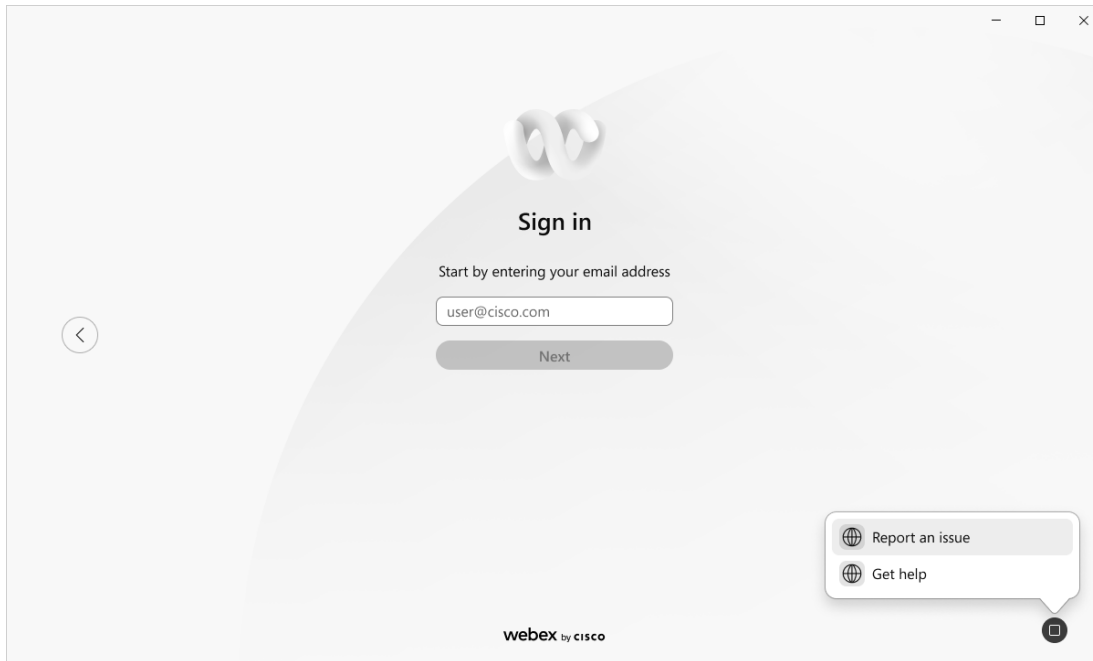

- Google
- O365
- AppleID
- Facebook

Enterprise admins can enable this for their users to be able to Authenticate with 3rd party Authentication services.

Existing users that have already created a password will see the option to select social to authenticate (at least once) to offer the ability to switch.

Allow Users to Send Feedback Pre-login

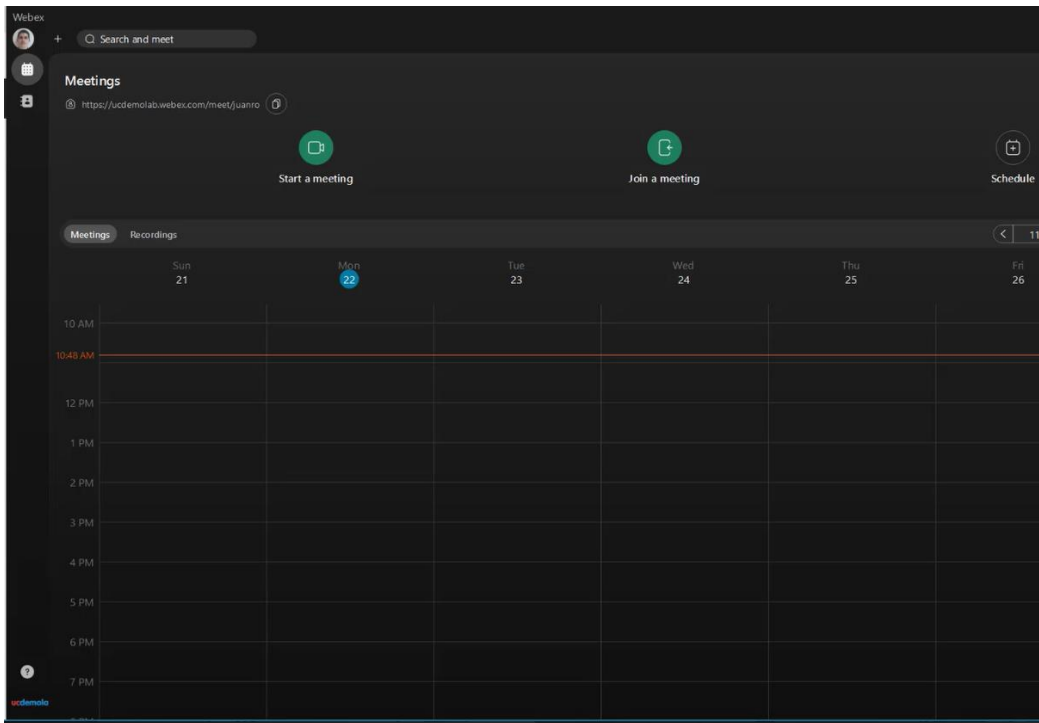

Win	Mac	iOS	Android	We b	FedRAMP	VDI
✓	✓	✓	✓	X	X	✓

- This was created to help capture issues occurring during a login failure
- Users will be able to send feedback through the same process as the **Send Feedback** menu item within the profile when they choose to report the issue

Tie Contacts Tab to the Calling Entitlement

Win	Mac	iOS	Android	Web	FedRAMP	VDI
✓	✓	✗	✗	✗	✗	✓

Past behavior:

- The contacts tab is visible in the app even if calling and messaging are hidden. Contacts is leveraged mostly by customers that have Calling. Customers moving from Webex Meetings Desktop app to Webex app don't want the contacts tab especially as they have hidden the other workloads and contacts does not provide any value add.

New behavior:

- Customer that has turned off messaging and calling - only meetings - They see only the meetings tab and if they insights then Insights tab.
- Customer that has turned off only messaging - has calling and meetings - They see contacts, calling, voicemail, meetings, insights.

Set your Pronoun

Making Webex more inclusive

Win	Mac	iOS	Android	We b	FedRAMP	VDI
✓	✓	✗	✗	✗	✗	✓

Users can specify the pronouns that they associate with and choose what groups can see them

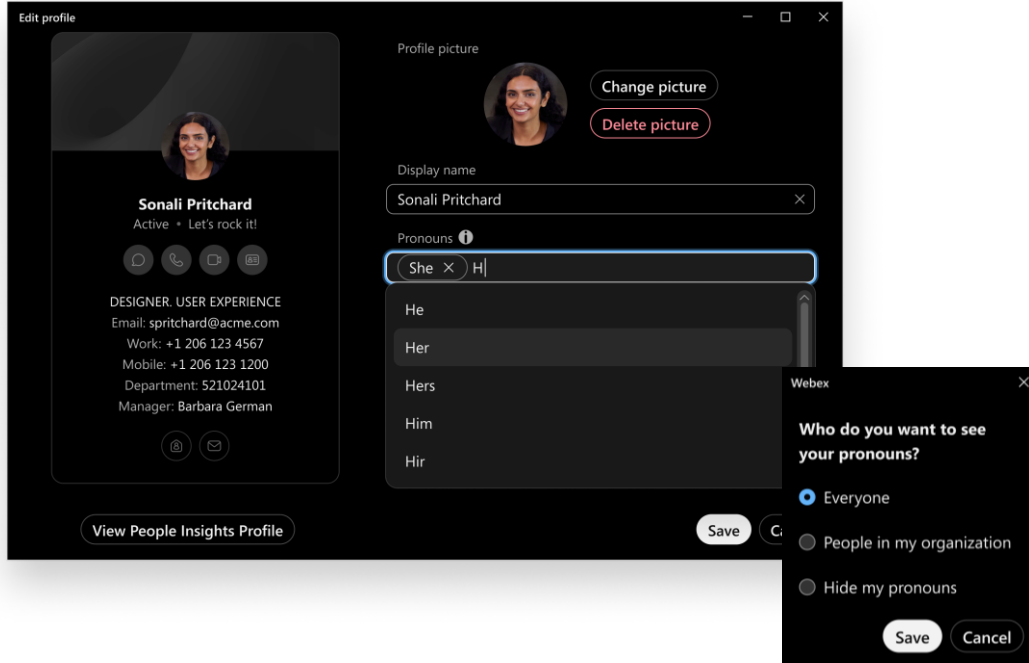

Update via 'edit your profile' in the app

Choose from a list or specify a custom pronoun

- The setting should be set to None/empty by default.
- Users should have a way to set their pronoun in their user profile (edit profile)

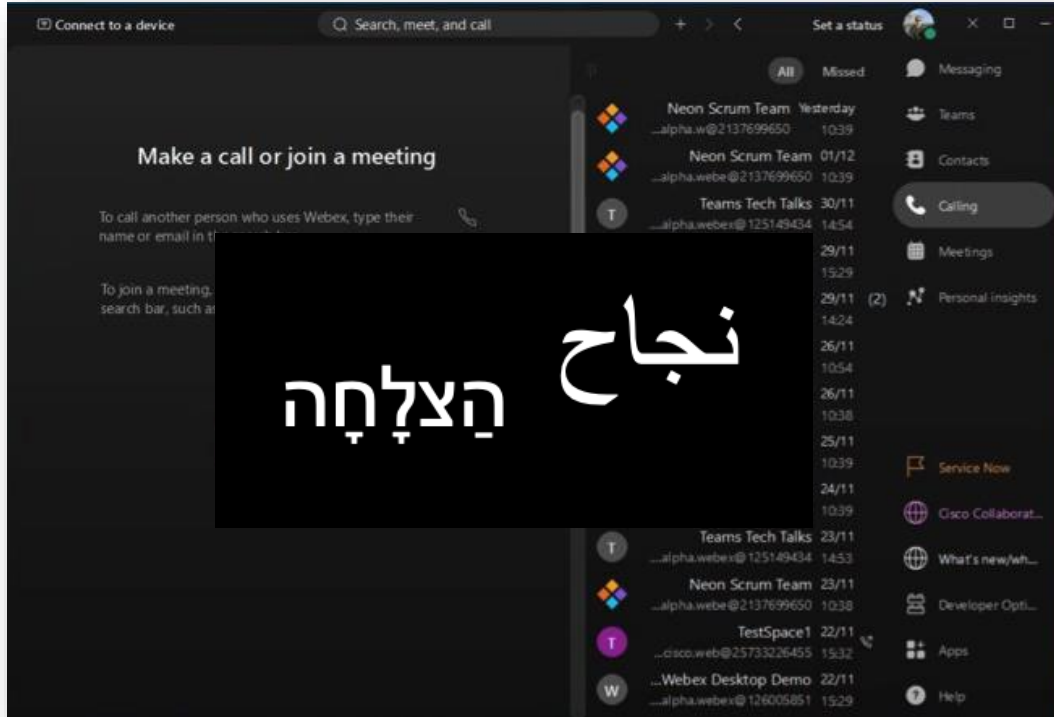

Pre-fed list of options

1. None
2. He/Him
3. She/Her
4. They/Them
5. Xe/Xem
6. Ze/Zir
7. Custom

Right-to-Left (RTL) Language Support

Win	Mac	iOS	Android	Web	FedRAMP	VDI
✓	✓	✗	✗	✗	✗	✓

The app will support languages that are read right-to-left by mirroring the UI and adding translations.

Arabic and Hebrew in initial scope

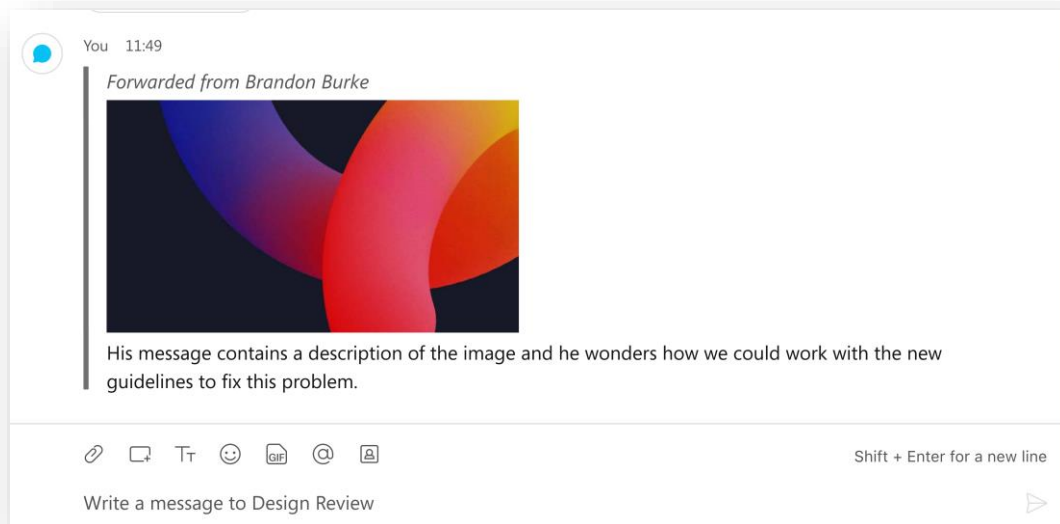

Desktop first; Mobile and Web timeline TBD

Messaging

Forward Messages with Content

Forward messages *and* files in just a few clicks

Win	Mac	iOS	Android	We b	FedRAMP	VDI
✓	✓	✓	✓	X	X	✓

Now when you forward a message, the content (files/images) will also be forwarded too

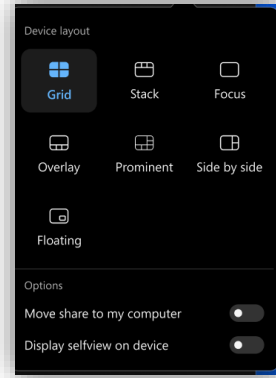

The label 'forwarded from...' will appear on messages that have been sent from another space

Available on desktop and mobile

Calling

Win	Mac	iOS	Android	We b	FedRAMP	VDI
✓	✓	✓	✓	X	X	✓

Move Screen Share to My Computer

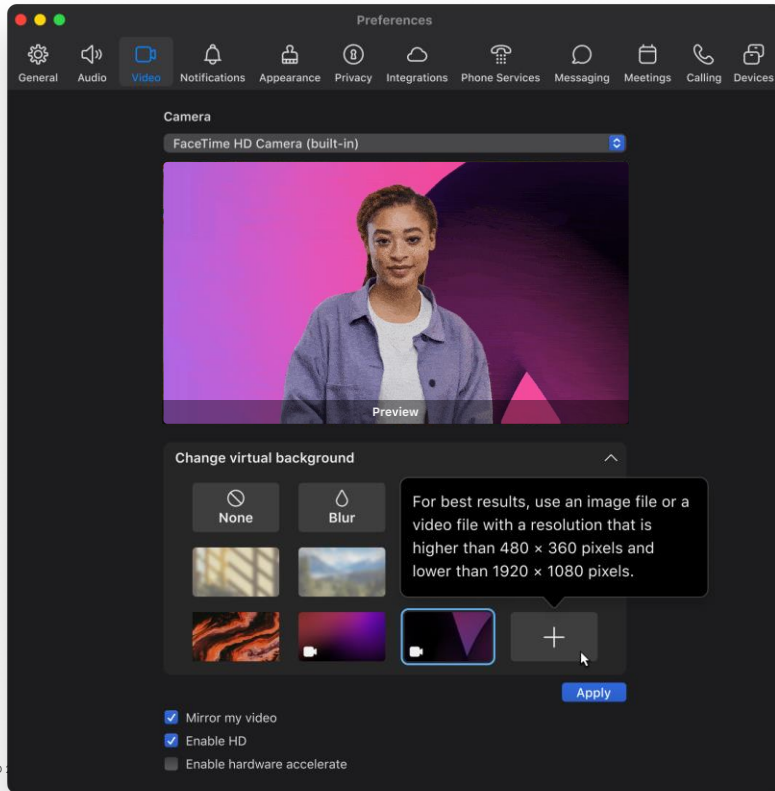

- When sharing from the Webex App paired with a device, the shared screen is duplicated on the Cisco room/Desk device minimizing the participant's videos.
- To improve the companion experience while joining a call/meeting with paired device, the user now has a new option to move the shared content to only the computer.
- So, the Room/Desk device can be dedicated to showing participants to allow better interaction.

GIF/MP4 Animated Virtual Background

Win	Mac	iOS	Android	We b	FedRAMP	VDI
✓	✓	✗	✗	✗	✗	✓

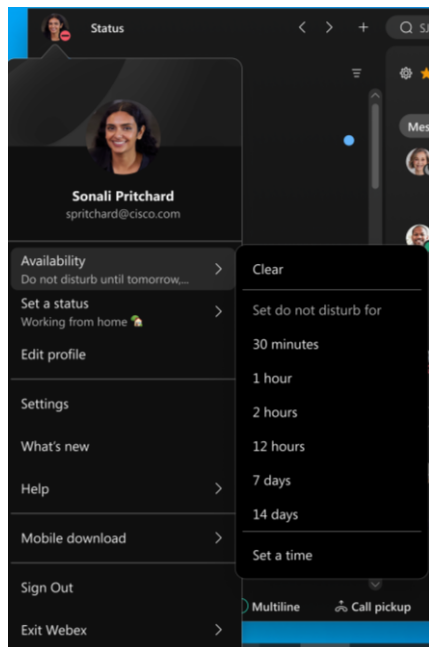

Webex now supports animated virtual backgrounds with GIF or MP4 format

There are two preset animated virtual backgrounds

Users can also choose their own ones

Telephony Do Not Disturb

Win	Mac	iOS	Android	Web	FedRAMP	VDI
✓	✓	✓	✓	X	X	✓

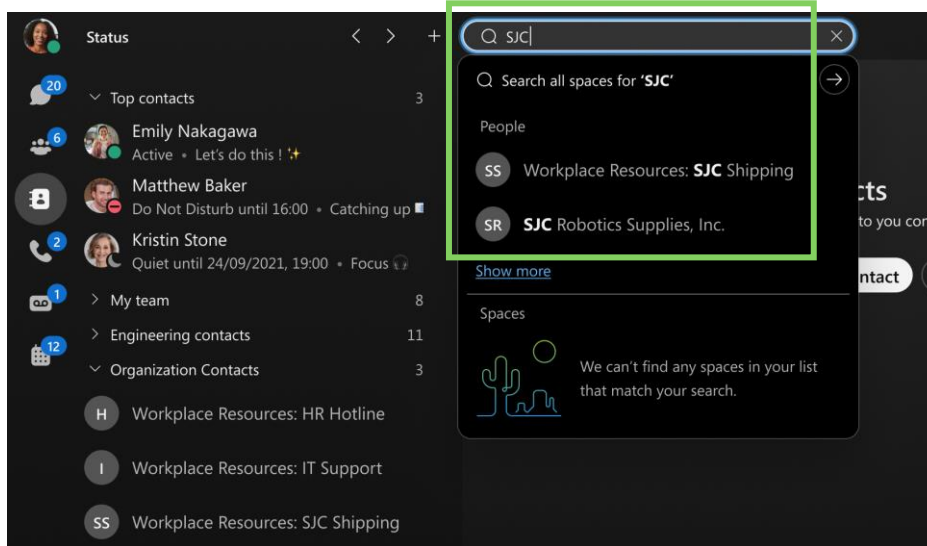

In Webex App users can set Do Not Disturb (DND) and this will decline calls on your desktop app, but your mobile app and desk phone will still ring. Users who do not want to be disturbed don't want any device to ring.

With this feature when a user sets DND on Webex App or on the desk phone, then the DND status will show correctly across devices, and no device will ring. Calls will typically go directly to voicemail.

Messaging notifications will continue to be filtered by Webex App. "Call on Webex" will continue to ring on mobile.

Organization Contacts Search

Win	Mac	iOS	Android	Web	FedRAMP	VDI
✓	✓	✓	✓	X	X	✓

Search non-people or non-Webex users within your organization

Available for Webex Calling and Unified CM on both desktop and mobile in April

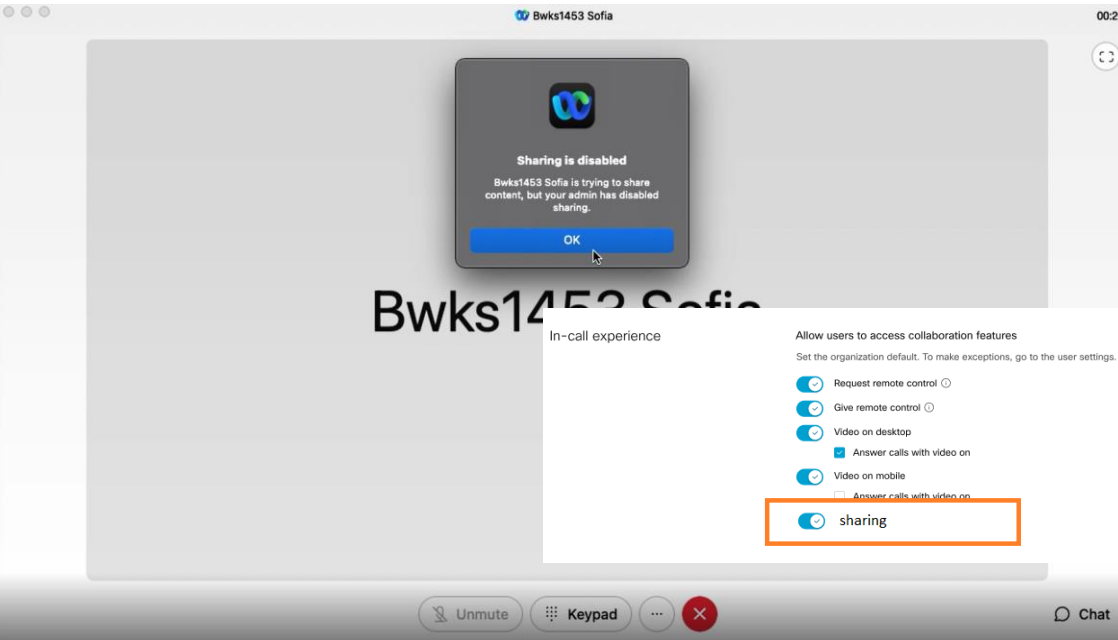

Support for Webex for BroadWorks is being planned

End users will be able to quickly find and call business relevant contacts (e.g. IT or HR Help Desk) directly from Webex App

Provides more comprehensive and consistent search experience in Webex App

Disable Share for Calling and IM ONLY Share

Win	Mac	iOS	Android	We b	FedRAMP	VDI
✓	✓	X	X	X	✓	✓

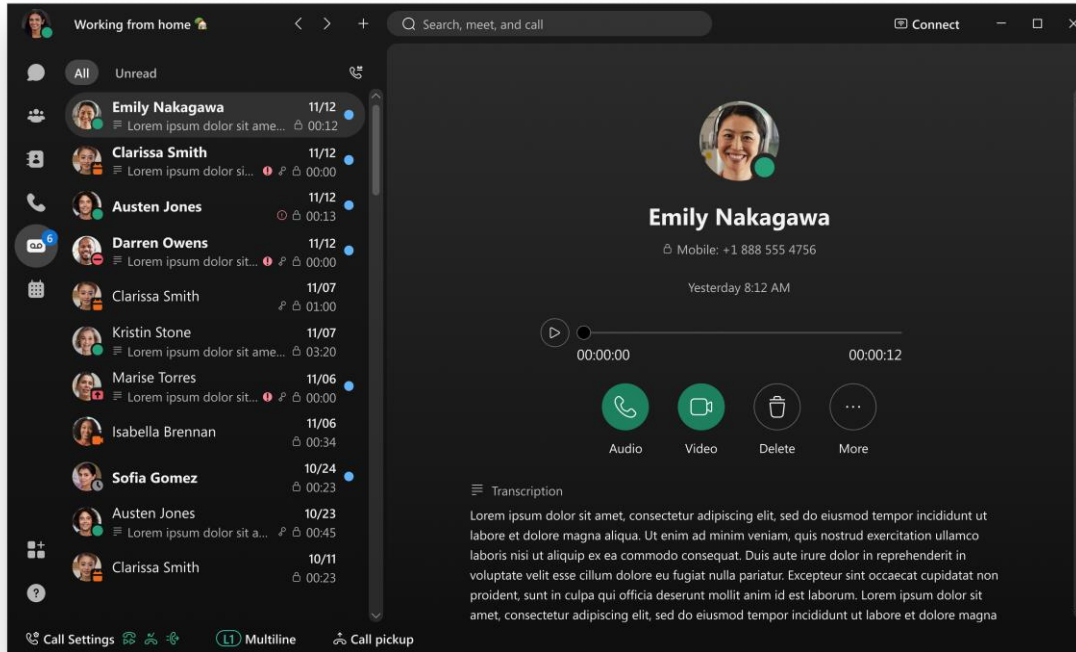

Some organizations can not have the ability to share content when being on a 1 to 1 call

With this feature administrator can disable the Organization to have Sharing capabilities when the users is on a 1:1 call

- The user will not see option to initiate screen sharing in 1-1 Webex Calling calls
- The incoming screen sharing requests are rejected and user will see informative message

Voicemail Transcription for Webex Calling

Win	Mac	iOS	Android	Web	FedRAMP	VDI
✓	✓	✓	✓	X	X	✓

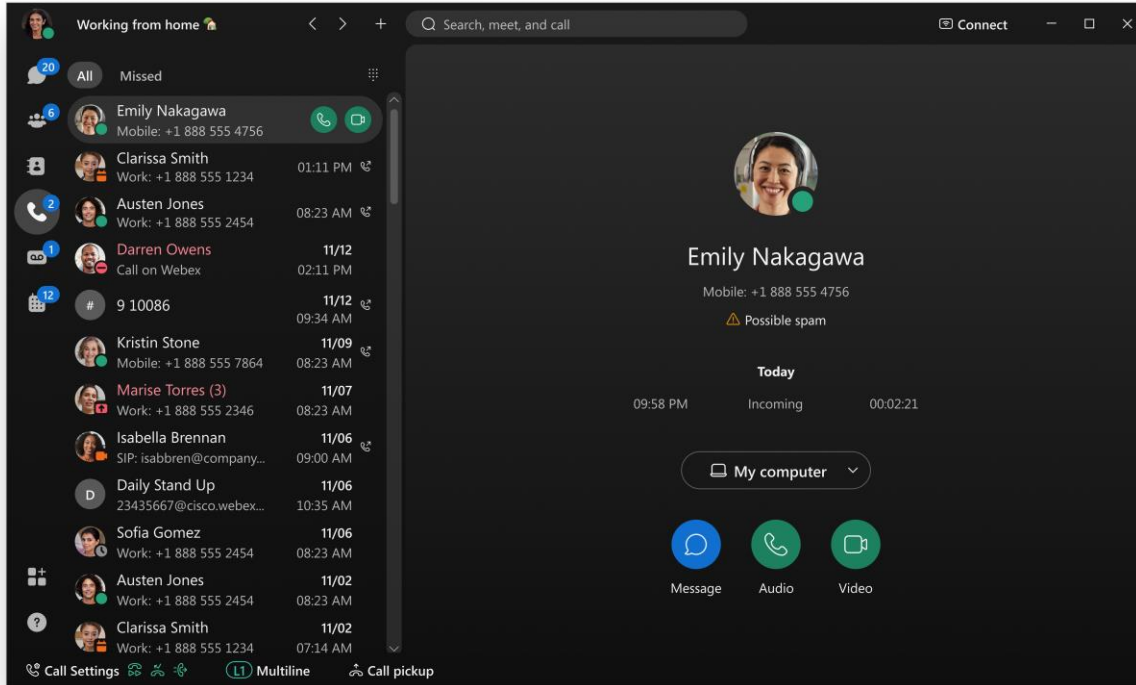

WxApp user should be able to see VM transcription as part of Visual Voicemail if VM Transcription is supported for the user.

WxApp user should see normal Visual VM when VM transcription is not available for WxUser.

VM Transcription should be deleted when VM is deleted. Managed as part of Voicemail and retention policy.

Spam Call Indication

Win	Mac	iOS	Android	Web	FedRAMP	VDI
✓	✓	✓	✓	X	X	✓

- The feature needs to be enabled through Control Hub to configure the backed so that it will analyze the incoming calls.
- Calling >> Service Settings >> Caller ID Validation
- With this setting you will see the following
 - Verified caller
 - Possible spam
 - Potential fraud
