Part A – The BT Internet Connect Reach Service

1 Service Summary

- 1.1 BT will provide you with a managed service that grants access to the Internet from one or more Sites using inputs supplied to BT by a number of third party suppliers, for you to resell to Customers. This service allows Customers to connect their branch offices and remote workers to the Internet, comprising:
 - 1.1.1 the Standard Service Components; and
 - 1.1.2 any of the Service Options as set out in any applicable Order, up to the point of the Service Management Boundary as set out in Paragraph 4 ("**BT Internet Connect Reach Service**").
- 1.2 BT reserves the right to migrate your BT Internet Connect Reach Service to a BT provided internet service should this become available in the future. Where this migration would result in additional Charges or terms that could be considered detrimental the migration will not happen unless both Parties agree in writing.

2 Standard Service Components

BT will provide you with all the following standard service components ("**Standard Service Components**") in accordance with the details as set out in any applicable Order:

2.1 Access Lines

- 2.1.1 BT will arrange for you to be provided with the Access Lines set out in your Order at your Sites. BT will connect the Access Line to a Point of Presence.
- 2.1.2 Access Lines may not be available in all countries. If BT cannot provide you with the Access Line that you ask for, BT will let you know at the time that you place your Order, and the Order, or relevant part, will be cancelled by BT.

2.2 Equipment

BT will arrange for you to be supplied with either NTE or a Managed Router (if you select this Service Option) at each Site and BT will arrange for that NTE or Managed Router to be connected to the designated Access Line.

2.3 Service management

BT will provide reactive management for the BT Internet Connect Reach Service. BT will raise a Ticket as set out in Paragraph 10 if it detects or you notify BT of a fault in the BT Internet Connect Reach Service and if necessary BT will register the fault with the relevant third party supplier for resolution, unless you have selected the Proactive Monitoring Service Option, in which case the BT Internet Connect Reach Service will be managed as set out in that Service Option.

3 Service Options

BT will provide you with any of the following options as set out in any applicable Order ("**Service Options**") and in accordance with the details as set out in that Order:

3.1 Managed Router

- 3.1.1 If you select the Managed Router Service Option, BT will install and manage (including providing maintenance, monitoring, configuration and commissioning of) a Managed Router for the BT Internet Connect Reach Service.
- 3.1.2 If you select the Managed Router Service Option, the Proactive Monitoring Service Option is included in your Order and unless BT tells you otherwise, BT will provide it to you as part of the BT Internet Connect Reach Service.
- 3.1.3 BT will continue to own the Managed Router at all times.

3.1.4 BT will arrange for the Managed Router to be configured and installed (both hardware and software) to make sure that the Customer has connectivity for its traffic across the BT Internet Connect Reach Service.

3.2 Proactive Monitoring

If you select the Proactive Monitoring Service Option, BT will proactively monitor the NTE or the Managed Router (as applicable) by pinging it at least every five minutes while the Service is in operation. If BT detects a fault, it will perform initial diagnostics within 15 minutes and, if necessary, it will raise a Ticket as set out in Paragraph 10 and register the fault with the third party supplier for resolution.

3.3 Service Options may not be available in all countries. If BT cannot provide you with the Service Option that you ask for, BT will let you know at the time that you place your Order and the Order, or relevant part, will be cancelled by BT.
