BT BEYOND LIMITS

A Rapidly Deployable Collaboration Solution for Teleworkers

FR FedRAMP

Powered by
Cisco Webex ® Meetings

Enable your agency to:
- Simplify collaboration across teams with a secure FedRAMP Authorized cloud-based solution
- Meet FISMA mandates
- Deploy industry leading cybersecurity
- Empower innovative collaboration solutions
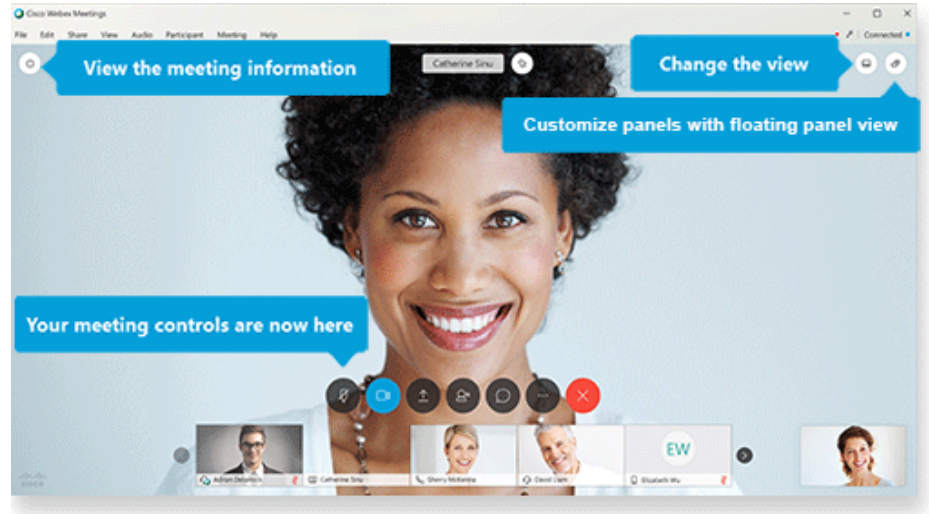

Add VALUE to your workforce

FedRAMP processes are designed to assist Federal government agencies in meeting FISMA requirements for cloud systems. FedRAMP does this by standardizing a variety of security related issues for cloud products and services used by Federal agencies, including:
- Security Assessment
- Authorizations
- Continuous Monitoring

Benefits to U.S. government agencies that are adopting cloud technologies:
- Cost savings
- Accelerated adoption
- Increased confidence in security

BT Federal, powered by Cisco, allows your agency users to rapidly and securely create and join meetings easily from their computer or mobile device. Participants can share content in real time knowing their data is highly secured using a FedRAMP Authorized platform. Collaborators can easily see each other. BT Federal is enabling agencies to enhance their teleworking capacity using Cisco Webex Meetings—a FedRAMP Authorized SaaS solution.
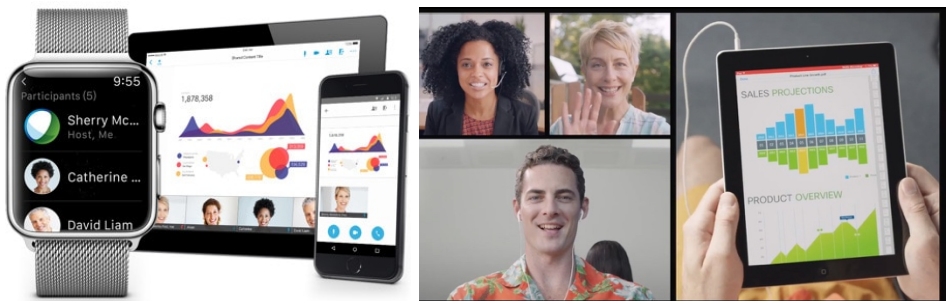

Cisco Webex Meetings lets you:
• Collaborate and increase productivity without the need for travel
• Make meetings more engaging with high-definition (HD) video, audio, and content sharing
• Leverage standards-based video conference rooms using a secure cloud-based video conference bridge
• Experience unlimited usage single fixed-price audio conferencing
• Deploy a full client-less experience (WebRTC/HTML5) for users outside your agency
• Benefit from strong security controls that meets Federal standards

BT Federal Solution Includes

BT FEDERAL

EIS FedRAMP Authorized Collaboration Solutions

How it works

BT Federal brings the Cisco Webex Meetings—FedRAMP Authorized solution to your agency with a variety of industry-leading collaboration tools to fit your needs. Our approach empowers your team with real-time video and data sharing anywhere, anytime on any authorized device.

- **Cisco Webex Meetings** Collaborate instantly, exchange ideas, and share content with attendees from your computer or on the go from your mobile devices.
- **Cisco Webex Training** Create interactive online training sessions, customize registration to gather attendee information, and invite panelists to manage and organize Q&As. Also monitor audience attention, provide private rooms for group discussions, test participants, and post records for self-paced learning.
- **Cisco Webex Events** Host large-scale multimedia web seminars, customize and automate registration for easy event organization, and automate email to organize events from invitations to follow-ups.
- **Cisco Webex Support** Helps resolve issues in real time with hands-on support using permission-based desktop sharing.

Features

BT Federal's Cisco Webex Meetings—FedRAMP Authorized solution allows you to use high-definition video to improve communications, relationships, and productivity by enabling people to meet face to face to share documents, presentations, and applications. Hosts and participants can launch or join meetings by computer, phone or tablet, making it easy for everyone to attend, even if they are in different locations. Features include:
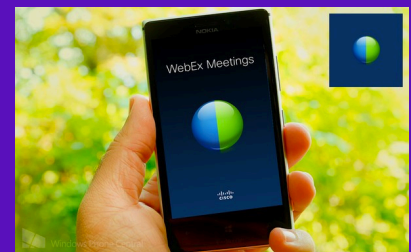

- **Collaboration Meeting Room (Cloud Video Conference Bridge)** Leverage your existing video investment in video meeting rooms to enable a cloud-based video conference bridge that lets up to 25 standards-based video teleconference endpoints join a Webex meeting online.

- **Webex Mobile** Get more done with this mobile app that lets you host and attend meetings, join online events, and attend training sessions from a smartphone or tablet.

Personal Rooms Cisco Webex solutions provide a dedicated URL that gives each host an online office to schedule meetings ahead of time or leave their door open and let people drop in, encouraging faster meetings.

BT Federal and Cisco

Your agency now has a rapid deployment model using the GSA EIS contract to deliver the Cisco Webex Meetings—FedRAMP Authorized solution. Your agency gets a robust, industry-leading, cloud-based collaboration solution that also adheres to stringent Federal security requirements and includes:

- Consistency and unparalleled reliability and security with operations and applications, regardless of where users reside
- A reputation as a proven and trusted provider
- A broad suite of solutions for collaboration in the cloud

BT Federal and Cisco are committed to providing the Federal government with the FedRAMP Authorized Cisco Webex Meeting solution you know and trust, through the OMB designated *Best In Class* EIS contract vehicle.
