Make the evolutionary leap to cloud-centric networking
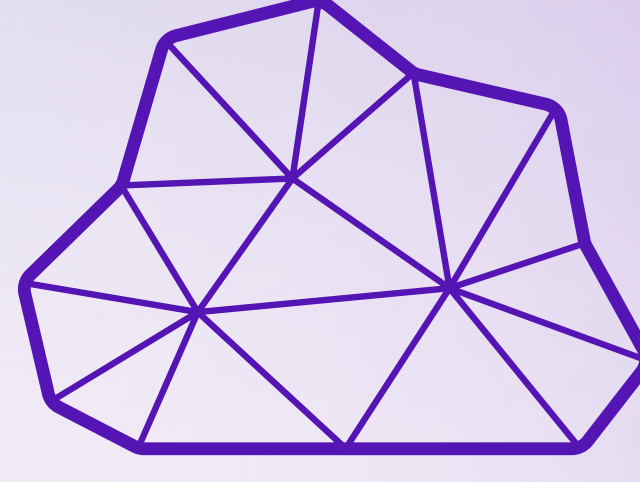

BT

Our pioneering new network-as-a-service platform, Global Fabric allows IT leaders to improve productivity by avoiding application downtime, removing network friction, and ensuring connectivity as their network evolves.

Outstanding operational flexibility

With Global Fabric, you get outstanding operational flexibility, allowing you to quickly switch between providers and services. Gain three services in one solution with multi-service edge – easily switch between IP VPN, internet and ethernet.

630 cloud products pre-integrated e.g. SaaS, SASE, Office 365

Direct cloud coverage into **74%** of hyperscalers' global PoP locations

Over **700** data centres worldwide

5 minutes or less to provision a new service

Global Fabric is built at the doorstep of the cloud – with unparalleled global coverage, including:

72% of AWS's global PoP footprint

85% of Azure's global PoP footprint

65% of Google Cloud's global PoP footprint

Cost visibility, flexibility, and control

Global Fabric allows you to optimise your cloud and network costs:

- Pay-as-you-use
- 1MB bandwidth purchasing increments - up to 200GB
- The choice of 1 day to 5-year contracts

Reliable application performance and resilience

Global Fabric can help to avoid application downtime with:

2 PoPs per metro to protect latency and cloud traffic even in the event of failure

Direct, high-bandwidth connectivity to **over 700** data centres worldwide

Elevating security for a cloud-centric future

Global Fabric combines inbuilt security with robust overlay security solutions, connecting and protecting your multi-cloud environment.

Inbuilt DDoS protection which you can boost as required

Service-chained firewalls for cloud-to-cloud and app-to-app protection

Direct links to Security Service Edge to protect all your users and sites

Palo Alto Networks | Fortinet | Zscaler | Netskope

100% coverage of Global Fabric PoP locations

Additional security overlay options to support your Zero Trust architecture

e.g. Endpoint Detection and Response | identity control | virtual firewalls | data security | threat monitoring and response

Increased sustainability

Global Fabric has sustainability embedded throughout and…

is powered by **100%** renewable energy

has a **79%** scope 3 reduction

Let your cloud ambitions soar
