

BT Radianz Services Managed Connectivity and Hosting for Financial Services

BT Radianz Cloud

The BT Radianz Cloud is the leading connectivity platform for financial firms around the world. All technology, operations, and customer support are tailored to meet the exacting requirements that financial services customers demand. The BT Radianz Cloud supports many thousands of financial customer locations around the world, providing connectivity to over 400 of the world's leading financial service providers including brokers, exchanges, market data sources, analytics, clearing firms, and other financial services providers.

BT Radianz Features

The unique design and capacity management of the BT Radianz Cloud results in low latency access to market data, trade execution, and trade cycle applications and services.

Advanced capabilities include BT Radianz Ultra, which provides low latency connectivity to market data, trade execution and trading partners in New York, London, Chicago and Paris. BT Radianz Proximity combines high performance connectivity with fully-managed hosting facilities to offer the fastest access to execution venues around the world. BT Radianz Venue Interconnect is a global, low-latency fabric providing connectivity between the world's major execution venues. BT Radianz Messaging ensures secure, reliable, tamper-proof and non-repudiable post-trade message delivery.

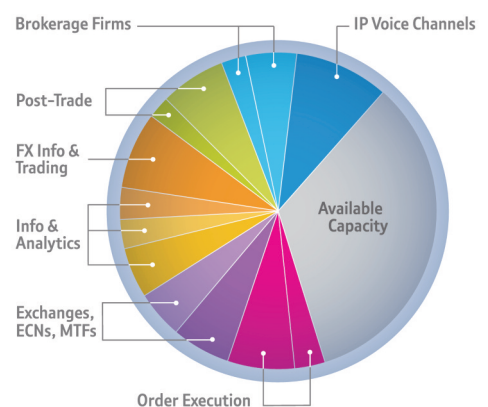

BT Radianz consolidates all of a customer's external market connectivity onto a single connection, ensuring fast, secure, reliable access to trading partners and services across the trade cycle for all asset classes. BT Radianz connectivity is fully-redundant, diversely routed to the customer site, and carries a 100% availability service level agreement (SLA).

The BT Radianz team designs and manages all connectivity to ensure that customers have the capacity and resiliency needed to trade, settle and communicate with their counterparties. Connectivity is constantly monitored, so as market volumes grow or customer requirements change, BT is able to scale each customer's connectivity quickly and remotely. This unique, scalable design allows existing customers to connect to new services and trade counterparties as quickly as possible.

BT for Financial Services

We have over 30 years' experience of providing network-centric, mission-critical services for data, voice and hosting for the financial community, including banks, brokers, exchanges, investment managers, payment processors, hedge funds, financial application providers, CCPs and CSDs. Our solutions cover the entire the trade cycle and range of trading strategies.

The BT Radianz model: Multiple services over a single connection
