

BT for financial services

## BT Radianz Cloud Connect: Delivering seamless access to major 3<sup>rd</sup> party cloud computing partners

### The customer challenge

The financial markets industry is highly demanding. Financial services organisations require secure, flexible and highly scalable compute resources regardless of geographic location.

#### **They need**

- To take advantage of cloud services to power their business
- Simplified connectivity with the ability to access multiple cloud compute providers
- Highly reliable connectivity with guaranteed levels of service availability
- A wide range of solutions and price points to meet a wide range of requirements
- A hybrid approach to meet a broad set of business challenges
- To use their existing Radianz infrastructure to connect and take advantage of public compute resources
- To lower their compute spend and investment in order to reduce business costs and TCO
- A flexible capability to consume services while matching costs to business demands.

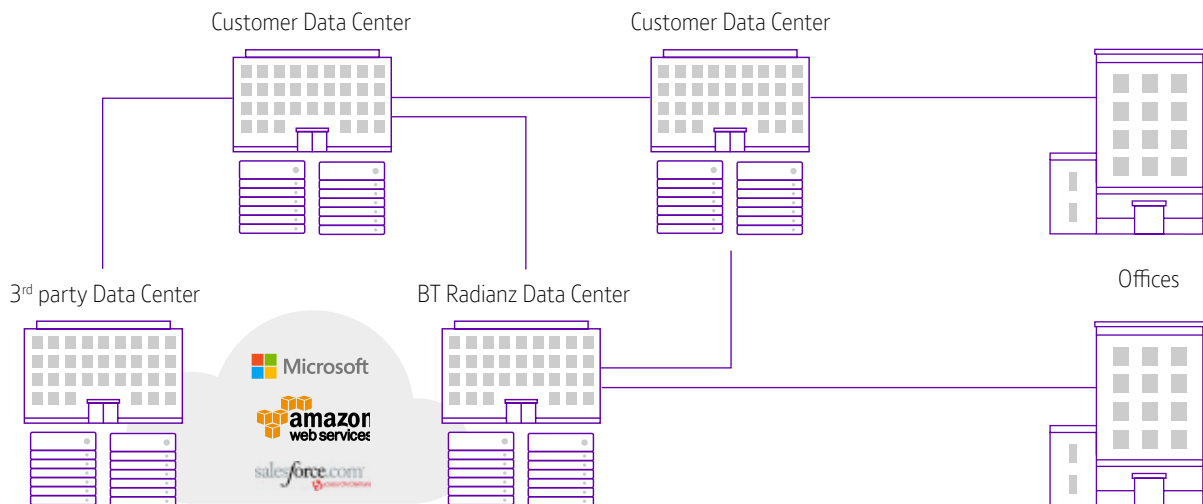

#### **BT Radianz Cloud Connect solution**

BT Radianz offers connectivity to multiple cloud providers with existing customer able to take advantage of their existing Radianz connection and consume public cloud resources through their nearest secure access point.

The BT Radianz Cloud Connect service can help make this happen by delivering connectivity between customers and 3rd party cloud providers like AWS and MS Azure.

BT Radianz Cloud Connect delivers secure, global access to public cloud services without the complexity of managing multiple suppliers. The Radianz network provides access to compute resources that enable customers to build solutions to meet business needs and reduce their costs.

## BT Radianz Cloud Connect offers a service that is simple, fast and reliable

### BT Radianz Cloud Connect delivers seamless access to major 3<sup>rd</sup> party cloud computing partners

BT Radianz Cloud Connect offers direct connectivity to leading 3<sup>rd</sup> party cloud providers. Connecting directly from the Radianz Cloud network allows you to access compute resources in a faster, more reliable and secure way. Multiple cloud providers are easily accessible through a single BT Radianz connection.

- Consolidated infrastructure and delivery of multiple services through a single interface with easy turn-up of bandwidth as demand increases
- Capability delivering access to multiple cloud providers from over 20 global data centres
- High levels of performance and service availability provided by the BT Radianz Cloud network – removes the unknowns with multivendor or internet solutions
- BT Radianz can deliver bespoke managed hosting and cloud based solutions to meet the customer requirements
- Secure, reliable service bandwidth that enables the customer to consume virtual cloud based products through the customers BT Radianz connection.

BT Radianz works directly with Cloud Computing partners to develop products and services specifically tailored for the financial services industry.

### BT Radianz delivering 3<sup>rd</sup> party cloud computing

#### Flexibility

BT Radianz offers managed connectivity to cloud compute providers enabling you to have managed connectivity that seamlessly extends your compute environment. Customers can build a solution to suit their business requirements, with BT Radianz able to offer global public, hybrid and private cloud compute solutions.

#### Availability

Customers' cloud services are supported with connectivity that offers predictability, consistency and guaranteed performance. BT Radianz Cloud Connect offers 100 per cent availability as a fully managed service with industry leading 24/7 global support.

#### Cost effective

Customers can access 3<sup>rd</sup> party cloud providers through their existing BT Radianz connectivity. Services can be delivered without the need for costly and complex infrastructure deployment.

#### Secure access

Network connectivity using BT Radianz Cloud delivers secure end-to-end access. It is a global service offered in multiple regions enabling the customer to access cloud compute resources regardless of location.

#### Simple, fast and scalable

Quick and easy service provision directly across the high performance BT Radianz network. Designed to be highly scalable, the BT Radianz Cloud Connect interface supports bandwidth up to 10G.
